1897. 4528 97

Year Book

of the

Young Men's Christian Associations

North America.

IMPORTANT RECENT BOOKS.

THE ACTS OF THE APOSTLES.

By Rev. J. M. Stifler, D. D. New cheap edition. 12mo, cloth, net 75c.

"We consider this a most valuable addition to the Biblical literature of the day, and hope that thousands of our Sunday-school teachers will own the volume."—The Golden Rule.

ST. PAUL.

His Life and Times. By Rev. Prof. James Iverach, M. A. "Men of the Bibie Series." 12mo, cloth, 7tc.

"If there be any Sunday-school teachers who really care to study in preparation for their work, this is the volume to recommend to them; and preachers of all sorts and conditions may derive no little benefit from many suggestive passages." —The Church Times.

THE LIFE OF ST. PAUL.

By Rev. James Stalker, M. A., author of "Life of Christ." 12mo, cloth, 60c.

"Bristling with information. As an outline of Paul's life it cannot be surpassed."—The Christian Inquirer.

"A model of condensation."-Peloubet.

BIBLE STUDY BY BOOKS.

By Rev. H. T. Sell. 12mo, paper, net 35c.; cloth, net, 60c.

It links the books together and shows the connected plan in the Bible. The facts have been gathered from the best sources. By judiciously coupling together certain books there are just *fifty-two lessons*.

"An admirable method."-The Advance.

"THE MAN CHRIST JESUS."

Studies. By Robert E. Speer. Fourth thousand. 16mo, cloth, 75c.

"The method of the book is simplicity itself. Conceived for the benefit of college students in the Summerschool at Northfield, given to them from the platform, and repeated again and again to other groups of students in this country and England, these chapters have been moulded by the unuttered demands of many minds, and have a largeness of view which comes from a response to such demands and is compatible only with perfect simplicity, with an niter absence of subjectivity." - Learagelist.

STUDIES IN JOHN'S GOSPEL.

Thirty studies on the Gospel of St. John, with several charts. By Professor W. W. White, of the Chicago Bible Institute. Long 18mo, paper, net, 25c.; cloth, net, 50c.

In this little volume Prof. White presents a unique and thorough study of what he terms the "heart of the heart of the Bible."

A MAN'S VALUE TO SOCIETY.

Studies in Self-Culture and Character. By Newell Dwight Hillis. 12mo, cloth, \$1.25.

"The volume is a storehouse of teaching for practical and spiritual life, set in unrivalled splendor of illustration and rhetoric and always wrought into solid arches of logical reasoning."—The Interior.

THE IDEAL PRAYER-MEETING.

Hints and Helps towards its Realization, by William H. Groat. 12mo, cloth, 50c.

Dr. William M. Lawrence says: "Mr. Groat has manifested rare fitness in the capacity of leader, and the suggestions which he sets forth in the volume are the results of much practical experience both in his own church and elsewhere. * * It will be found helpful to all, pastors and laymen, who have to meet the responsibilities of arranging for prayer-meeting,"

HOW TO OBTAIN FULLNESS OF POWER

In Christian Life and Service. By Rev. R. A. Torrey, D. D. 16mo, cloth, 75c.

This third volume rounds out the author's ontlines, plans and helps to a useful service in Christian work. It will be found fully to supplement the two former volumes, "How to Bring Men to Christ" and "How to Study the Bible for Greatest Profit."

OBJECT LESSONS FOR CHILDREN:

Or, Hooks and Eyes, Truth Linked to Sight. By Rev. C. H. Tyndall, A. M., Ph. D. Profusely illustrated. 12mo, cloth, \$1.25.

Rev. A. F. Schauffler, D. D., in commending the object method, says of the author: "He is the cleverest man of the age in that line."

INEBRIETY.

Its Source, Prevention and Cure. By Charles Follen Palmer. 12mo, gilt top, net, 50c.

"This is a very comprehensive, 'meaty' little volume * * The intimate relation between mental states and physical appetites, inherited tendencies and acquited habits, is discussed fully; the typographical arrangement of the book making its study very convenient."—Voice.

'Thoughtful and practical."-Congregationalist.

MISSION WORK.

Organization and Methods. By Rev. E. M. Bliss, D. D., editor of "The Encyclopedia of Missions."

16mo, paper, net, 15o.; cloth, net, 30c.

Contexts: I. Object and Motive of Missions; II. Organization of Missions; III. Agencies on the Field; IV. Methods. Evangelization, Zenana and Medical Work; V. Methods. Education, Bible Translation and Literature; VI. Methods, Church Formation, Self Support, Social Development.

THE ORGAN OF THE YOUNG MEN'S CHRISTIAN ASSOCIA-TIONS OF AMERICA. Issued weekly, \$1.50 per annum. In clubs of ten, \$1.00 per annum. Write for sample copy and premium offers.

For sale by all booksellers, or sent postpaid, on receipt of price by the publishers.

Best Books

For Young Men's Christian Association Students.

"A knowledge of business is absolutely necessary to success."

BUSINESS FORMS.

CUSTOMS AND ACCOUNTS

By Seymour Eaton, Director of the Department of Business, Drexel Institute, Philadelphia. Book of Blank Forms, \$1; Manual to accompany same, 50 cts.

A new workable course having for its basis the application of business principles. Practical exercises drawn from actual business transactions. Short method of teaching bookkeeping. Fac-similes of forms used in mercantile transactions.

HEFFLEY'S PHONOGRAPHY

A complete manual arranged in progressive lessons for class use and for selfinstruction. Based on the Pitman system, it embodies all the improvements of recent years, and contains in simplified and systematic form a complete explanation of all the principles, word-signs and contractions required for reporting. Everything interfering with the easy acquisition and practical application of phonography for mercantile purposes has been either modified or omitted.

PATRIOTIC CITIZENSHIP By Thomas J. Morgan, Ex-United States Commis-sioner of Indian Affairs; Member of the National Council of Education, etc. Cloth, illustrated, \$1.00

A new text-book in civics for schools and the general reader. Dr. W. T. Harris, United States Commissioner of Education, says : "I think Morgan's 'Patriotic Citizenship' is the most successful attempt yet made to prepare an interesting and instructive book for schools and the people on this special topic. It seems to me that its author has been successful in adopting a clear and conversational style without the loss of explicitness and accuracy of thought. He has been happy too, in the subjects which he has selected for discussion."

SPENCERIAN VERTICAL PENMANSHIP.

Best series of Copy-books in the vertical style. Letters modeled on the graceful forms of the well-known Spencerian slanting script—the standard in American Teaches a combined finger and muscular arm movement, resulting in speed schools. and legibility, thus rendering vertical penmanship practicable for business purposes.

Books sent prepaid to any address on receipt of prices. Besides the above we publsih admirable text-books in all subjects recommended in the courses of study prepared by the Educational Department of the International Committee. Circulars and descriptive catalogues of our text-books in any of the departments—commercial political, industrial, mathe-matical, scientific, language, music, free on request. Correspondence invited.

THE BOSTON LIBRARY BINDER.

* * * *

IN ONE-HALF RUSSIA.

The covers have cloth sides with Russia leather back and corners, giving great strength and durability to the parts receiving the greatest wear.

Gold lines at junction of cloth and Russia leather, and title with border stamped in gold, give a rich and attractive appearance to the binder.

The workmanship is the very best example of the bookbinders' art, and cannot be excelled.

It is confidently asserted that the Boston LIBRARY BINDER is the simplest and best binder ever made.

TN FULL CANVAS.

This style is made of extra quality canvas, that is one of the strongest and most durable fabrics that can be used.

The canvas is a sage green color that will not show wear and dirt readily.

Two front covers of the periodical the binder is to hold are pasted one on each the front and back cover of the binder by a process that renders it practically impossible for them to peel off or to be defaced by ordinary wear.

This gives a distinctive appearance to the binder, and whichever side is uppermost on the table it can readily be distinguished from the other binders.

The two front covers to be pasted on the binders are to be furnished by the Library ordering binders.

CAST-STEEL WORKS OF Fried. Krupp, Essen, Germany.

AMERICAN OFFICE, 15 GOLD STREET, NEW YORK. P. O. BOX, 2878.

Represented by THOMAS PROSSER & SON.

These works cover an area of 1,200 acres; employ about 30,000 men, have the most mproved plant, and stand unique, from the fact that they have their own Ore and Coal Mines, Blast Furnaces, etc. and that *every* stage of manufacture is under their own supervision, and are not (like others) dependent on the open market for a miscellaneous assortment of crude material, which, in connection with 75 years' experience, enables them to turn out a product of very superior quality, second to none, and at the same time the different grades of Steel are always of the same *same uniform* quality.

LOCOMOTIVE TIRES, STEEL TIRED WHEELS, AXLES, CRANK PINS, SHAFTS AND STEEL FORGINGS UP TO 70 TONS.

Steel of every description Forged, Rolled, etc., into any form or article desired.

After a test of over 35 years, the "KRUPP TIRE" has proved itself to be the best in the market, and parties intending ordering Locomotives would do well to insert in their specifications that "KRUPP TIRES" be used on drivers, and thereby obtain an article which will give satisfaction.

[RECEIVED TOO LATE FOR INSERTION IN YEAR BOOK.]

BIENNIAL REPORT OF JOHN TRUMBULL SWIFT,

Secretary for Japan.

In my report to the International Committee for 1895, the following points were treated somewhat in detail, viz.: (1) That the first ten months of the year were spent in rest according to the orders of my physicians; 2) that immediately thereafter I returned to Japan, arriving in Tokyo on September 30, and (3) that the remaining two months were spent in quiet work for the Tokyo city association, while at the same time I was engaged in renewing by correspondence my relations with the college associations in different parts of the empire, and in pushing through a large mass of necessary clerical work which had accumulated during my absence in America, that had been unexpectedly prolonged from five to seventeen months.

During the first half of 1896 my time was devoted to the affairs of the associations in Tokyo, to the study of the language, and to preparation for the coming of Mr. Mott, whom we expected at first in the spring and afterwards in the early summer. His visit to Australasia and unexpected delays there necessitated the making and abandoning of the first two programs arranged for him.

In the Tokyo city association the year has been marked by an encouraging growth. 'The membership at its close stood at 372, having more than doubled in the two years. The students in the evening school numbered. in 1895, 140, and in 1896, 122, the decrease being due to the disastrous floods, by which many families were ruined early in the year and the number of students in Tokyo diminished. The same causes made it impossible to do as well financially in 1896 as in the previous years. The high order of entertainment and instruction given in the Saturday evening lecture course has been fully maintained, the speakers being in almost every case men of national repute in the subjects presented. The boarding house has been overcrowded throughout the year, and it has been a constant grief to our members and a disappointment to many parents and pastors in the interior provinces that larger accommodations could not be provided to extend their homelike and Christian influences around a still larger body of young men. The comparatively small amount needed to build and equip this interesting branch of our work presents a grand opportunity for some one to make an unusually good investment. The rooms of the Tokyo city association building have steadily increased in popularity, and have already become historic as the birthplace of the Anti-Opium League and the Prison Reform Associations, and other like organizations of national importance.

Most encouraging of all has been the religious work of the association. The Sunday meetings in 1895 were attended by 5,000 young men, and in 1896 by 6,120. Enquiry meetings following the larger gatherings have been held with an average attendance of about thirty. President Oshikawa of the Sendai Tohoku Gakuin reports that on a recent evangelistic tour in the country towns around Sendai he baptized a number of young men who, in answer to his questions, said that they took their first steps in Christian life in the rooms of the Young Men's Christian Association in Tokyo. Rev. Mr. Shimanuki, the pastor of a church near the building, recently received to baptism twenty young men, most of whom gave similar testimony. Thus from two places, one of them 250 miles and the other about as many feet away from our building, come reports that speak both for the effectiveness and extent of the evangelistic work done in it. The Tokyo association has also maintained its magazine which now has a monthly circulation of 520 copies. In this way and by correspondence the influence of the association reaches out to quite a number of societies more or less closely resembling it in character and purpose. In all these undertakings the self-denying labors of Messrs. Niwa, Matsumura and Onuma, the secretaries at the Tokyo building, have been uniformly patient and fruitful. I regret to report that Justice Miyoshi has felt it necessary to resign the presidency of the association after so many years of efficient labor with us. He feels, Lowever, that all his time is needed for the building up of his school for the reformation of minor criminals. He has served the cause of young men in Japan most efficiently. In the presidency he is succeeded by Captain Serata of the imperial navy.

The other associations outside of Tokyo remain as last year, their number having been increased only by a new organization in Yokohama, making the total number of city associations in the empire seven.

The visit of James Stokes made the summer memorable in many ways, and both pleasant and profitable. Our only regret was that the season rendered it impossible for him to come in contact with any of the associations in actual operation.

The latter part of the year and the first month of 1897 were devoted exclusively to preparation for Mr. Mott's coming, and in accompanying him on his tour among the colleges. Arriving on November 9th in the southwestern part of the empire he visited in succession Nagasaki, Yamaguchi, Fukuoka, Kumamoto, Kyoto, Kobe, Osaka, Okayama, Nagoya, Tokyo, Sendai, and Yokohama, touching at these points the students of at least forty schools and colleges. Of these fourteen were connected with missions, the others being government and non-Christian institutions. At nearly every place evangelistic meetings were held together with smaller gatherings for the benefit of Christians and conferences with college men for the organization of new college associations or the improvement of those already existing. The evangelistic meetings were remarkable, being the largest gatherings of the kind ever held especially for Japanese students, the attendance in several instances exceeding a thousand. At these meetings the names of 225 young men. after careful discrimination, were taken as being those of earnest enquirers; and of these many have already been baptized while still others not included in the number are now receiving Christian instruction. The work of organization increased the number of college associations from eleven to twenty-eight, and these again by a memorable convention, held in the Tokyo association building on January 18 and 19, were brought together on a strong basis, forming the Student Young Men's Christian Association Union of Japan. Few men visiting Japan have in so short a time exerted such a uniformly helpful influence or succeeded in impressing the likeness of Christ so deeply on the hearts of those who heard him.

Addendum.

BIENNIAL REPORTS OF THE AGENTS OF THE INTERNATIONAL COMMITTEE.

1895-1896.

BIENNIAL REPORT OF RICHARD C. MORSE, General Secretary.

I.-In direct relation to the committee and its board of trustees :

1. The monthly meetings of the committee have been held as usual and attended by the general and office secretaries. The eight sub-committees have met as the exigencies of the work have required. The general secretary or a representative of the office has been present at these meetings, and, whenever practicable, one or more of the visiting secretaries who are under the direction of the respective sub-committees.

2. The annual conferences of the committee and its secretaries have been continued, as indispensable to effective concert of action. The conference of 1895 was held at Poughkeepsie, N. Y., August 29 to September 2, and that of 1896, at New London, Conn., September 4-8. At these gatherings each department of the work received in turn full consideration. The members of the committee present and every secretary came into full sympathy with the work in all of its departments. After each conference an evening was spent in New York city, when the members of the committee and the secretaries dined together and reviewed the special problems in the work. The wholesome effect of these conferences has been very noticeable in a better understanding by each member and secretary of the work of his associates and of his own work in its relation to the entire field of the committee's service.

3. The annual dinner meetings of the committee and its friends were held in New York on November 21, 1895, and November 12, 1896. These have grown in interest and attendance. The last one commemorated the thirtieth anniversary of the permanent establishment of the committee in New York. Among its early members who participated in the addresses were Messrs. William E. Dodge, Cephas Brainerd, Morris K. Jesup, Timothy G. Sellew and R. R. McBurney. At these meetings the international work in its numerous and continental phases is made visible to friends who either are already interested in it or who are disposed to learn concerning it. One impression invariably created by the gathering is the urgent need there is that a work which is carried on so quietly and unobtrusively, and which is so much less visible than the local work, should secure more frequent opportunities of being seen by those who would be disposed to give it a place in their prayers and practical sympathies.

In response to effort in this direction, dinner meetings were also held in 1895, at Manchester, N. H., October 21st; at Chicago, November 5th; and at Cleveland, November 7th. In 1896 parlor conferences were held in Ontario, at St. Catherines, September 17th; and at Brantford, December 17th. 4. The board of trustees has continued its careful oversight of the invested funds of the committee.

II.—In relation to the visiting secretaries and agents of the committee :

1. With each visiting secretary and agent of the committee correspondence has been maintained, in pursuance of the instructions of the committee and its sub-committees. As the number of the secretaries has increased and they have been occupied in the different departments of the work, the general secretary, in preserving the unity and efficiency of administration, has dealt chiefly, in the field, college, railroad, foreign, office and financial departments, with the senior or leading secretary in each of these departments. The absence of Mr. Mott during the latter part of 1895 and all of 1896, and of Mr. Wishard during fifteen months of these two years has necessarily increased the burden of administration resting upon the general secretary. But, with the co-operation of the college and office secretaries, each department has been carried on and the standard of its efficiency maintained, as indicated in the reports of the secretaries.

2. It has been necessary, as heretofore, to supplement in some departments the work of the regular secretaries by special agents. L. E. Buell labored for a month among the associations of Kansas. W. H. Sallmon visited college associations in the Maritime Provinces in 1895, and R. M. Vaughan did a similar work in Tennessee and Kansas in 1896.

Through the kindness of the Montreal association its valued secretary, D. A. Budge, devoted much time, without expense to the committee, to investigation of the condition and needs of railroad men on the Grand Trunk railway, preliminary to the establishment of railroad branches among them.

III.—In relation to the office work, office secretaries, correspondence, and publications:

1. Nothing is more interesting in the study of the international work than the relation existing in its administration between (1) the visiting force of the committee upon the entire association field and in its various departments and (2) the office force in charge of the correspondence, publications and other numerous details inseparable from the wide and multiform work to be prosecuted.

Erskine Uhl is in general charge of the office work, and also acts as recording secretary of the committee, co-operating with the general secretary in his relation to the sub-committees and the dispatch of their correspondence and work.

No department of the office is more important than that relating to the financial correspondence. This involves communication with more than two thousand contributors to the international treasury, and with more than six hundred associations which, through appropriations from their treasuries, contributions to the extension fund, or collections in the week of prayer, co-operate to furnish the support needed by the committee in carrying out the instructions of the conventions.

P. Augustus Wieting, who became connected with the committees' office eighteen years ago, and who has of late years given general oversight to the treasurer's books and accounts, and rendered invaluable aid in the publication department and in other details of the office work, was compelled, deeply to the regret of the committee and his associates, to leave New York in 1895 on account of the condition of his health. His patient and vigilant fidelity has made his loss severely felt, and Mr. Wieting carried with him the hearty esteem and good wishes of all his associates.

W. E. Lougee has succeeded Mr. Wieting in giving general oversight to the treasurer's books and the financial correspondence. The enlargement of this correspondence has made it necessary for the general secretary to receive increasing co-operation from Mr. Lougee, and also from Mr. Cree, as well as from some of the visiting secretaries.

Charles E. Lyman, the bookkeeper, has rendered a faithful and efficient service during the past four years.

John Glover has administered the secretarial bureau of the committee with unvarying skill and efficiency, keeping the register of the general secretaries and physical directors upon the whole field, recording notice of secretarial changes, responding to the applications for information from associations seeking employed officers, and from employed officers or candidates seeking positions. This correspondence has been accompanied with numerous personal interviews calling for very much of his time. In this difficult service he has constantly received co-operation from his associates, and has had the advantage of their knowledge and experience upon the whole field.

Since January 1, 1895, 120 men have found positions as secretaries and physical directors through our aid.

At the office personal intercourse or correspondence was held with 451 others, 219 of whom were not prepared to undertake the work, ninety-five found places in it through their own efforts, fifty-five already in the work remained in the positions which they occupied, and eighty-two left it.

On January 1, 1895, thirty vacancies were on record as needing our attention; 220 applications have been added to these, making 250 altogether, for state secretaries and their assistants, for general secretaries and their assistants, and for physical directors. Of the 250 vacancies we assisted in filling 120; 130 were filled through the action of others.

Of the vacancies that we helped to fill, one was in Canada; twenty in New England; thirty-five in New York, New Jersey and Pennsylvania; thirty-eight in states west of these, and twenty-five at the south. Four were in general work.

George L. Leonard has performed a very important and varied service involving vigilant care of the general business details of the office and the administration of the publication department, with its ever growing list of publications in need of revision and of new material regarding all departments of the committee's work. He has also rendered indispensable aid in the correspondence and administration of the foreign department, looking after numberless details connected with the wants and communications of the foreign secretaries. These were unusually numerous during the absence of Mr. Wishard for fifteen months.

H. S. Ninde has co-operated with Mr. Leonard in the publication department, rendering expert service in the editing of pamphlets and in attention to that large section of the committee's correspondence consisting of requests for information, much of which is contained in the publications of the committee.

H. W. Georgi, in the summer of 1895, succeeded C. S. Cooper as office secretary in the college department, and has efficiently conducted that portion of the committee's correspondence, co-operating also with the visiting college secretaries in occasional service upon the field.

IV.—In relation to the state conventions :

In response to requests of the state committees arrangements were made for the representation of the committee at 66 state and provincial conventions during 1895 and 1896. The names of these representatives are given on another page in the list of these conventions. It is a testimony to the efficiency and value of such representatives of the committee that the urgency of the calls for their services increases from year to year.

V.-In relation to the world's conference and its committee :

Important correspondence has been maintained with the committee of the world's conference at Geneva, Switzerland. Following the instructions of the jubilee conference of 1894 this committee has taken the important step of securing a second secretary, and has been greatly favored in the successful choice of Christian Phildius, for more than twelve years the efficient general secretary of the Berlin association, and a prominent leader in the association work on the entire continent of Europe. He has already rendered excellent service as a visiting secretary of the world's committee.

The usefulness of that committee's work has been increased far beyond the necessary increase of expense involved in the addition of Mr. Phildius to its force. But this increase of expense has called forth a request for additional help from American friends, and Mr. Cree has assisted the general secretary in securing the American contribution needed. Mr. Cree also greatly aided the deliberations of the world's committee, representing our own committee in these deliberations in Switzerland both in the summer of 1895 and of 1896 and without any charge of traveling expenses to the treasury of the committee.

VI.—Personal visitation:

The general secretary has attended the general secretaries' conferences at Hartford and Cleveland, and the student summer schools at Northfield. He has attended several state conventions and conferences with association officers in a number of cities, and has delivered several anniversary and other addresses.

In January, 1896, he represented the committee at a meeting held in Cincinnati in memory of Mr. H. Thane Miller. He was also present at the Ohio state convention in the following month and co-operated with the convention and committee in beginning the securing of a permanent fund for the international work, to be known as the "H. Thane Miller memorial fund "

He has also continued to serve as the chairman of the graduate committee of the Yale Young Men's Christian Association, and as trustee of the association training schools at Springfield and Chicago, and has co-operated with the National Council of Great Britain as its corresponding secretary for America, and with the International Central Committee as its American honorary secretary.

BIENNIAL REPORT OF ROBERT WEIDENSALL,

Secretary.

During the past two years my time has been seriously interfered with by family affairs—settlement of estates, etc. Notwithstanding, I have been able to do a good amount of work and without expense to the International Committee.

1. Conventions.—I attended the international convention at Springfield, Mass., 1895, making an address at the laying of the corner stone for the Training School dormitory; the secretaries' conference at Hartford, 1895, and at Cleveland, 1896; the international secretaries' meeting immediately following each of these conferences; the international secretaries' conference of the Young Women's Christian Associations in Pittsburgh, 1895; the Minnesota convention and general secretaries' conference, 1896, at each of which I presented the county work; the Chicago district convention at Joliet, 1896; the Kentucky state convention, 1895; the Illinois state committee meeting in Chicago, January, 1896.

2. County work.—I have given much time to (1) sending communications to county conventions and to the press, and in personal correspondence; (2) interviews with state secretaries and others; (3) seeking out and interesting good men for the county secretaryship; (4) assisting state secretaries and committees to draft rules, etc., for the government of the county work.

In accordance with previous arrangements I canvassed Jefferson County, W. Va., with the view to a county work. I attended the following county conventions in Minnesota; in December, 1895, Olmsted County, Plain View, and spent the following week in visiting the local bands and teaching their training classes; also made a public address on the county work at Dodge Center; in February, 1896, Rice County, Faribault and Dodge County at Dodge Center, and in March, Fillmore County, at Spring Valley. The towns were greatly stirred by the practical work accomplished. I also met with the county committees at each of these conventions, assisting them to outline their year's work.

In accordance with a prearranged plan, State Secretary Brown and other secretaries met with me in Aurora, Ill., March, 1896, to inaugurate the county work in Kane County. The plan is to develop here a model county work.

I attended in June, 1896, in Minnesota. the summer outings of Olmsted and Dodge Counties at Orinoco and of Fillmore County near Lanesboro. The outings were more or less interfered with by rain-storms, but were excellent in character and results, and helped to demonstrate the excellency of the county work. At Poynette, Wis., August, 1896, I assisted in starting the Columbia County work.

3. Volunteer extension movement.—This is an effort by means of volunteer workers and the establishment of normal training classes at selected centers to extend an organized personal work into every section of a large city. The plan is being successfully inaugurated by the Chicago association and I have given much time in conference with the Chicago management to drafting regulations, appointing committees and organizing training classes. 4. Western Secretarial Institute.—I was present at Lake Geneva during the entire sessions of 1895 and 1896. In 1895 I presented the work of the International Committee, both home and foreign; in 1896 I was appointed chairman of the program committee. I assisted in arranging the organic union between the Secretarial Institute and the Chicago Training School.

A library case has been given me by the above institution in which I have placed for its benefit most of my association papers, documents and letters relating to the work with which I have been connected as an international secretary.

5. Miscellaneous.—In addition to matters already spoken of I have attended to the following: During 1895 I spent several days in Louisville, Ky., in special service for the International Committee; made a public association address at Council Bluffs, Ia; attended a thanksgiving service at the Milwaukee association; and raised some money for the International Committee at Cedar Rapids, Ia. During 1896 I addressed a special gospel meeting at Spring Valley, Minn.; attended by request several important meetings of the Chicago board of directors; also a farewell reception to Secretaries Louis Hieb and W. W. White before their departure for India.

BIENNIAL REPORT OF THOMAS K. CREE,

Secretary.

The first six months of 1895 were spent in Europe in the interest of association work there, and without expense to the International Committee. I assisted in organizing the association at Rome, Italy, and in securing funds for procuring quarters preparatory to the arrival in 1896 of the general secretary, Agide Pirazzini, who was then in training at the Springfield School. The association rooms are centrally situated and an excellent work is being carried on.

Some time was spent at Nice in conference with Sir George Williams regarding the local association. At Marseilles I endeavored to arrange for the employment of a secretary, and the indications now are that one will soon be located in that city. A week was spent at Lyons helping to secure funds for the enlargement of the work in new quarters and for the transfer of the French Central Committee to Paris.

I visited Paris, where matters have progressed in a very satisfactory manner. One result of the good work of the Paris association has been the contribution, by a benevolent French lady, of \$124,000 for the inauguration of a work for young women, to be partially under the same control as the work for young men although with a different organization. In London I conferred with the English National Council in relation to the work on the continent. I also visited Geneva, meeting with the Central Committee, and subsequently visited Berlin twice and Elberfeld once seeking to promote the securing of Christian Phildius of Berlin as the committee's second secretary.

After my return much time was given to financial work at the office and elsewhere. Many Sundays were spent with associations, giving addresses on the international work. Most of 1896 was given to financial correspondence, and the routine of office work and solicitation of funds in different localities, varied by occasional attendance at conferences and other association gatherings. I attended a parlor conference at St. Catherines, Ont., and the conference of the international secretaries.

During the summer of 1896 I again visited Europe in the interest of association work, without expense to the committee, attending a special meeting of the Central International Committee at Geneva, at which Mr. Phildius was promoted from acting to permanent secretary, the result of his work during the year having abundantly shown the wisdom of his selection. During the fall and winter financial and office work and personal solicitation occupied most of my time, together with numerous addresses on association work.

BIENNIAL REPORT OF W. E. LOUGEE,

Secretary.

My connection with the International Committee as one of its secretaries began in January, 1895, with the two-fold purpose of rendering aid to the local associations and to the committee in its financial department.

Previous to the Springfield convention I spent some time at Butler, Pa, arranging to complete a canvass for funds for building; and later, visited Toronto, Ont., to help remove a troublesome indebtedness upon the building of the West End branch; and also spent some time at Mobile, Ala., where help had been asked for, in connection with funds for a building. But the necessary withdrawal of Mr. Wieting from the committee's service in the autumn of 1895 and the condition of the financial department of the committee's work has made it necessary for me to give most of my time to a needed co-operation with the general secretary in this administration. The cares of administration in connection with the growth of every department of the committee's work has made it necessary that the general secretary should be relieved of attention to many details and that the place of Mr. Wieting in attending to some of these matters should be supplied.

The committee's work has grown not only in every department, but the number of those who contribute and must contribute to it in order that it may be sustained in the future, has also increased to such an extent that the financial correspondence requires vigilant attention and the co-operation of each secretary to such an extent as his contact with the work and the constituency of the committee may make desirable. To organize and unify this large correspondence, as it relates to more than two thousand donors who contribute to the work yearly and the hundreds of associations which make contributions from their treasuries or through the extension fund or through collections on the day of prayer, has been no small task.

I have also given careful attention to the details connected with the preparation for the annual dinner meetings and other conferences and dinner meetings held in connection with the work of our committee.

BIENNIAL REPORT OF C. K. OBER,

Field Secretary.

With my residence at Chicago, my work has been in the central west, the northwest, the far west, the east, on the Indian reservations and in general field supervision.

1. In the central west my relation to the association work has been largely advisory, very little of my time being required by actual problems in the field, as the work of detail supervision in the six states comprising this division has been well cared for by the state committees and state secretaries. Many conferences and consultations have been had, however, with representatives of state and local work both at Chicago and in the various fields concerning state and local problems and in matters of common association interest.

2. In the northwest, during 1895, part of the time of C. M. Copeland and C. S. Ward was secured for work chiefly in Nebraska, Manitoba and the Dakotas, and during 1896 Mr. Copeland served this section as a field secretary of the International Committee. I have also rendered personal service in these states at conventions, in visits to city associations, committee meetings and in co-operation with Mr. Copeland. I have also cc-operated with the directors of the Minneapolis association and with the Minnesota state committee in the efforts to save the Minneapolis building and to put the work of that association upon a more effective basis.

3. In the far west, I have visited the associations at Salt Lake City and Ogden, Utah; Pocatello, Idaho; Denver, Colorado; Phœnix, Arizona; San Francisco and Oakland, California, and all the city associations in Oregon, Washington and British Columbia. I have also attended four association conventions and conferences in Oregon and Washington, and have given special attention to the situation at Portland, aiding in the reorganization of the association and in securing \$35,000 of the amount needed for a building. Special help was also secured for the executive committee of the Pacific Northwest by which they were enabled to retain the services of their efficient traveling secretary, Mr. Dummett, during 1896, which was a critical year in their work.

4. In the east, the money was raised and a new field secretary of the International Committee employed, W. B. Millar, who, with his residence at New York City, has had special relation to the field north of the Potomac and east of Pittsburgh and Buffalo, including Canada. I have co-operated with Mr. Millar in establishing, at the invitation of Mr. Moody and with his co-operation, a summer rendezvous for the young men of our eastern associations, "Camp Northfield" at Northfield, Mass., open during the months of July and August. It was successfully conducted in 1895 and 1896, and promises to be a very helpful factor in our association work. I have also co-operated with the executive committee of the Maryland group in the reorganization of the work in its jurisdicticn.

5. On the Indian reservations, I have given considerable time to the supervision of our Indian association work, counseling and co-operating with Dr. Eastman, helping to secure financial support and aiding in the

organization and conduct of an Indian association summer school on Big Stone Lake, S. D., in 1896, which was attended by forty-nine Indian delegates and proved very beneficial to the work of the Indian associations.

6. In general supervision, I aided the Young Men's Era in the reorganization of that enterprise and have helped to secure financial support for the editorial management of the new paper. With Dr. D. Hunter McAlpin, Jr., of the International Committee, and W. B. Millar, I helped to plan and organize the "International Women's Auxiliary," furnishing a tangible and systematic opportunity for influential Christian women to co-operate in the support and extension of our international work for young men. I have also given considerable time in conference with the committee and the general secretary to various problems and interests of the work of the International Committee and of the department of general field supervision and to the securing of financial support.

BIENNIAL REPORT OF CECIL L. GATES,

Field Secretary.

During the two years covered by this report my efforts have been directed toward securing, for the several sections served, uniformity in standard and method, greater breadth of purpose, increased interest in Bible study, strong secretarial service, sound financial management and business-like administration. In direct connection with these efforts, Missouri, Kansas, Nebraska, Colorado, Idaho, Utah, Texas, Louisiana and Mexico have been visited, while incidental visits have been made to New York, Connecticut, Massachusetts, Tennessee, Illinois and Alabama.

In 1895 and prior to February, 1896, much time was given to state and local work in Missouri. Many of the problems were worked out and the associations all placed under favorable conditions. The city and railroad work of Kansas City has received considerable attention since that date. Both departments of the work have been completely reorganized, and notwithstanding some losses and difficulties are now conducting a very successful service.

In Kansas I have co-operated with the state committee and state secretaries and have personally aided several local fields.

Arkansas having no state secretary has required considerable attention. The state work is now self-sustaining and the local work, where organized, is in better condition. College work and work in small towns is being developed.

In Texas assistance has been given in visitation of local fields and in counsel upon difficult situations and in emergencies.

Various state and local problems in Colorado and Nebraska have been investigated and progress toward solution has been made. Aid has also been given to several local associations.

A visit to Mexico was made in September, 1895, in connection with the complications that had arisen in the conduct of that most difficult field, especially at the City of Mexico. Sufficient financial aid not being immediately available, the reorganization of that work was deferred to a more favorable time.

Service has been rendered in connection with the railroad departments at Pocatello, Ida.; Denver, Col.; Kansas City and Slater, Mo.; North Platte and Grand Island, Neb., and Ellis, Kan. The railroad work at Pocatello, North Platte, Grand Island and Ellis has been reorganized and is now prosperous. At North Platte considerable progress has been made toward securing a building.

Several conferences of college association men have been attended and aid has been given in the development of plans for the forwarding of college work in different sections.

Aid in financial solicitation has been given at seventeen local points and in connection with the work of Arkansas, Missouri, Kansas and Texas and the International Committee.

Twelve associations have been assisted by personal service in the reorganization or rehabilitation of their work.

The various conventions and conferences of the associations and secretaries of the several states mentioned and the international convention and conferences have been attended.

The association camp at Northfield was visited in the summer of 1895 and one week was given to the student summer school at Knoxville, Tenn., in 1896.

The volume of correspondence and office work has steadily increased as has the number of personal conferences on association affairs. Much time has been devoted to securing secretaries for various positions and to facilitating their work in new fields.

In the intervals between the details of work enumerated various public services, gospel meetings, anniversaries, board, committee, and auxiliary meetings, and special addresses, have served to fill the time not necessarily devoted to traveling.

BIENNIAL REPORT OF H. P. ANDERSEN,

Field Secretary.

The field south of the Ohio and east of the Mississippi has continued to require most of my attention during the past two years. I have, however, attended state conventions in Arkansas, Maryland and Wisconsin, and in the fall of 1896 spent two weeks in North Dakota engaged in a financial canvass at Fargo. My residence and headquarters were transferred from Atlanta to Asheville in the fall of 1896.

An extensive correspondence has kept me in constant touch with the state committees and associations in the south, and much office work has been required in seeking to extend the observance of the week of prayer and aid the committee in securing financial support for its work in that section. The work done upon the field may be summarized as follows:

1. Aid to state organizations.—In spite of repeated efforts on the part of the state committee of Tennessee to secure a secretary this was not accomplished until May, 1896. In the meantime, it was arranged that I give one-fourth of my time as acting state secretary. After the resignation of Secretary F. B. Smith in August, 1896, the same relationship was resumed. In looking after this work much time has been given to counseling with the state committee, arranging for thorough visitation of the college associations, aiding local associations and arranging for successful state conventions at Sweetwater and Murfreesboro. In spite of many difficulties this aid has made it possible for the state to report no decrease in the number of associations or members during the two years.

I also co-operated with the state committee of North Carolina in the fall of 1895 in securing F. P. Turner to succeed L. A. Coulter as state secretary. In the fall of 1896 a vacancy occurred in the state secretaryship of Alabama and Mississippi, which involved several visits to the headquarters of each committee, resulting in the employment of L. E. Buell, jointly by the two state committees. The continued financial depression has made it necessary to assist the state committees of Kentucky, Tennessee, Virginia, North Carolina and Alabama by a financial canvass in each state. Largely as a result of such aid all these committees are in a more hopeful financial condition. Much time has been given to attending meetings of state committees, counseling with state secretaries in regard to the policy and method of state work and helping in times of special difficulty. A meeting of the southern state and international secretaries was held in Atlanta in December, 1895, at which the problems of state work from the standpoint of the state secretaries were discussed, promoting a greater unity of effort throughout the south.

2. Aid to local associations.—The city organizations have continued to demand very close attention in the line of their finances. Protracted service was rendered at critical periods to the associations in Asheville, Winston and Raleigh, N. C., and Chattanooga and Clarksville, Tenn. Vacancies have also made it necessary to assist boards of directors in securing general secretaries believed to be adapted to the peculiar fields needing them. As a result of much correspondence and personal interviews such aid has been given to Bristol and Clarksville, Tenn., and Raleigh and Asheville, N. C. Calls for addresses and advice at special emergencies have been frequently received and responded to. In the fall of 1895 a tour was made with the educational exhibit among some of the associations of Kentucky,

3. Summer schools.—About six weeks of my time each year were given to aiding the college committee in providing for and holding the Knoxville student conference, in looking after all the business arrangements connected with it, including the office work, the advertising and financial management. In 1896 it was arranged to hold in connection with this meeting a conference of association delegates from cities and towns, which was exceedingly helpful.

4. Conventions and conferences.—In addition to the conventions previously mentioned, I represented the committee at eight state conventions in five southern states, and attended the international convention at Springfield and the international secretaries' conferences at Hartford and Cleveland, acting as a member of the executive committee of the former conference. I also attended the international railroad conference at Clifton Forge, Va; have conducted many gospel meetings, prayer meetings and Bible studies, and led daily meetings during the week of prayer for young men for the association at Asheville, N. C.

REPORT OF W. B. MILLAR,

Field Secretary.

I began work for the International Committee in the summer of 1895, in connection with the first association summer camp at Northfield, Mass., and the annual convention of the Maritime Provinces. My regular work, however, did not begin until October 1st of the same year. With headquarters at New York city, my work has been largely confined to the territory north of the Potomac River and east of Ohio.

During the year and a quarter, several months have been given in the capacity of state secretary in states temporarily without executive officers. In September, 1895, the secretary of the Maryland group resigned and the executive committee deemed it inadvisable to secure another immediately. At the same time the work of several important associations in this field had reached a crisis and there was a demand for aid and supervision. The most important of these situations was the one at Washington, D. C. The association building had been burned in August of 1895, and in October the efficient general secretary died. The work at two other important places was endangered and at still other points there was need of immediate attention. Under an arrangement with the International Committee I have been able to give several months of service to this executive committee. A quick response has come from the entire field. Vacancies have been filled with strong general secretaries and nearly every local point shows a decided gain in efficiency.

In October of 1895 a special request came from the Maine state committee for aid in its work. Several months have been thus occupied. A thorough visitation of the associations in the state has been made, assistance given in solving local problems, and two annual conventions have been held.

At the request of D. L. Moody, the International Committee undertook the holding of the second summer camp for the young men of our town and city associations at Northfield, Mass., during July and August, 1896. To the making of the arrangements for this and securing an attendance was devoted considerable time and thought. Over 225 young men attended, and reports from associations represented show a most satisfactory return for the effort expended.

I came into touch with the association work among the Indians by attendance upon the first Indian summer school at Big Stone Lake, South Dakota. Here it was my province to give the history and growth of the association movement, illustrated with the stereopticon, and also several talks on the life of Christ and kindred topics, similarly illustrated. A more attentive and earnest body of students it has rarely been my pleasure to meet. A little later a trip was made with Dr. Eastman to several places where the work of the Indian department of the committee was presented and money secured towards its maintenance.

I also attended the conference of the colored associations held at Hampton, Va., and there had my first experience with this part of our work. It was an excellent conference and indicated marked development in this department.

Some little time has been given to the formation of the International

Women's Auxiliary. Nearly every local association has had the organized co-operation of the women and this has been no small factor in the success of the association movement. It is hoped that the organization of interested women into an international auxiliary will prove of great value to the work. One feature of the auxiliary work will be the holding of parlor conferences where the work of the International Committee may be presented. I have assisted in preparing the pamphlet "Young Men and their Friends," especially designed for use in such conferences.

I have given some time to the committee's financial work; have endeavored by correspondence and otherwise to acquaint myself with the conditions and needs of the work in the portions of my territory that I have not been able to visit; have spoken at several dinners given in the interests of the international work and have taken part in fourteen conventions and conferences.

REPORT OF C. M. COPELAND,

Field Secretary.

My work with the International Committee during 1895 was occasional and special, occupying five months and divided between Nebraska, North Dakota and Manitoba. During 1896 my entire time was spent in the committee's service.

In Manitoba the transition (which was begun a year or two before) from the employment of a provincial secretary for his full time to the employment of one for the summer only, with occasional help at other times and at an expense within the committee's reach, was successfully completed and the work not only held together but strengthened.

In North Dakota I gave aid in connection with the state convention and made a few visits of two or three days each for counsel and co-operation at secretarial points. In South Dakota I made two visits to Sioux Falls, the only city association in the state.

I attended the Indian summer school at Big Stone Lake on the northeast border of South Dakota, which was a marked success. Some time was spent in Minnesota, attending state and county conventions and cooperating with the state committee especially at St. Paul and Minneapolis. C. S. Ward, formerly of Grand Rapids, Mich., has entered upon the duties of the general secretaryship at the latter place, and a successful solution of the local problems is looked for.

As acting state secretary for Nebraska I spent more time there than in any other part of my field. The state is not yet in a position to employ a permanent agent. The work, however, has a little more than held its own during the year and the situation on the whole is encouraging.

REPORT OF JOHN R. MOTT,

College Secretary.

During the first half of the year 1895 I was occupied chiefly with executive work in connection with the college department of the International Committee, and also as chairman of the executive committee of the student volunteer movement. During that time, in addition to visiting college associations, I attended nine conventions, revised all the college association pamphlets which I had written in previous years and wrote two new pamphlets. In July, 1895, I started on an extended tour to promote Christian life and work among the students of foreign lands.

In giving a summary of the main facts in connection with this tour, which came to a close early in the year 1897, I do so with gratitude to God for His guidance, protection and energizing power, and with the desire that others may recognize His hand in all that has been accomulished.

In the summer of 1894 I received invitations to attend the conferences of Christian students in Great Britain, Germany, Scandinavia and Switzerland, to be held in the summer and fall of 1895. At the same time invitations were received from the leaders of Christian work among students in India to conduct a campaign in the interest of Indian students in the winter of 1895-96, and from workers among students in Japan to visit the students of that country in 1896. These six invitations were given entirely independent of each other, and were received within a few weeks of each other. After much prayer, and after consultation with friends and prominent workers, it was decided to accept the invitations, and to make a somewhat extended tour to promote Christian life and organized Christian work among the students of other lands. When the missionaries of China and the Levant learned of the proposed tour, they sent urgent appeals for a visit to their colleges and for the conduct of conferences. After starting on the tour I was induced to include in it the student centers of Australasia. The expenses of the trip were met by a special fund given by a few Christian men and women.

It has required twenty months to complete this tour of nearly 60,000 miles, or considerably more than twice the distance around the world. Work has been carried on in twenty-two different countries, and in 144 universities, colleges and schools. Service has been rendered in twentyone conventions and conferences. These were attended by over 5,500 delegates, of whom fully 3,300 were students and teachers representing 308 institutions of higher learning. About 1,300 missionaries have been met personally, representing over eighty different missionary agencies, and extended interviews have been held with several hundred of these, as well as with government officials, merchants, and many native pastors, teachers and students.

Seventy student Christian associations have been organized, not counting the reorganization of a number of societies already existing. Encouraging reports have been received with reference to the work of nearly all these new organizations. We have also been privileged to help in the organization of five national student Christian movements. Three of these movements have since secured secretaries and steps are being taken to obtain additional helpers for the other two. We have co-operated in the preparation of a prayer cycle for each of these movements, and also in the preparation of eleven other publications in connection with their work. All of these national organizations are making gratifying progress. Much time and attention at the outset of the tour were devoted to helping in the formation of the World's Student Christian Federation, which in turn has done much to make possible the developments along the pathway of our work. The new national movements have been affiliated one by one with the federation, and corresponding members have been appointed in twelve countries which do not have national movements. A great deal of time has been spent, chiefly while on the sea, in extended correspondence securing information concerning the moral and religious condition of students in all parts of the world. The greatest privilege and responsibility which has come to us in all our relation to the student work has been that of helping to establish and make real this world-wid₆ federation of students.

As a result of evangelistic meetings and personal work in the different countries, 505 young men, nearly all students, have been led to accept Jesus Christ as their personal Saviour. This includes those who had been Buddhists, Hindus, Mohammedans, Confucianists, sceptics and agnostics. At least 2,222 students and Christian workers have entered into covenant to keep the "morning watch," not to mention what has been done to promote associated Bible study. About three hundred students have volunteered, that is, dedicated their lives to Christian work. More than five-sixths of this number are students in mission lands. Wherever possible the student volunteer movement has been organized as a department of the national student work. The larger significance of this uprising of volunteers in mission fields is seen when we view it as the inauguration of a student volunteer movement for home missions, which places on the students of each mission land a special burden of responsibility for the evangelization of their own people.

What have been the causes of the success with which God has blessed this tour? In the first place, we would mention the financial co-operation of the men and women whose foresight. Christian spirit and generous assistance made the tour possible. Another factor has been the willingness of our colleagues at home, who were already heavily burdened, to assume, with great unselfishness, the additional responsibility for our work in America. Record should be made also of the long years of patient and self-denving seed-sowing by the missionaries in all the fields visited, without which there could have been no such large ingathering Emphatic reference should be made to the remarkably thorough preparation made for the tour in different countries, as well as to the strong cooperation rendered during the tour, by leading workers among students in the different countries, and by the various local committees which they enlisted. The most efficient cause, however, has been the work of the Spirit of God as a result of the prayers of friends and workers all over the world. This volume of prayer has increased as we have gone from land to land, so that before the close of the tour we had received letters indicating that our work had a place in the prayer life of men and women in nearly thirty countries.

Time after time have we stood before the walls of difficulty, opposition and peril which were, so far as men could judge, unsurmountable, and have seen them fall to the ground in such a marvelous manner as would be totally inexplicable apart from the almighty unseen forces of the prayer kingdom being wielded on our behalf. The work of this tour, then, has not been in any sense the work of one or two during twenty short months, but rather that of a world-wide circle of "laborers together with God" reaching through the long years. Some men have planted; others have watered; God himself has given all the increase.

BIENNIAL REPORT OF F. S. BROCKMAN,

College Secretary.

1. Association gatherings.—Forty-seven conferences, conventions and summer schools have been attended in fifteen different states. More time has been expended in this way than in any other one feature of my work. The opportunity which has thus been afforded, however, of influencing leaders in over three hundred colleges has fully justified the large expenditure of time and effort.

2. Visitation.—Eighty visits have been made to forty-nine institutions. The great increase in executive duties has made it necessary to confine visitation largely to important institutions or critical situations.

Assistance has been given in the organization of twelve new associations. Considerable time has been employed in securing general secretaries for the associations in the larger institutions and advising with them. The increase in the number and efficiency of these new powers in the college associations is one of the most gratifying advances of the past two years, but it places also a new and weighty responsibility upon the agents of the International Committee.

3. The student volunteer movement for foreign missions.-During the absence of Mr. Mott from America I have been acting chairman of the student volunteer movement. Largely as a result of his wise and praverful planning previous to his departure the past two years have shown a marked increase in every line of its activity and practical helpfulness to the college associations. The educational department has reached a high degree of efficiency. Last year 34,000 students in three hundred and ninety institutions completed one of the courses of missionary study. The problem in the medical colleges has been for the first time seriously grappled with. For the first time also the theological seminaries have had a man devoting his entire time to their visitation. The warmest commendation of the movement has been received from the missionary boards of the various churches and from the missionary secretaries in their last annual meeting. For this gratifying progress as well as for their helpful influence in numberless ways upon the college associations mention must be made of the able and godly corps of secretaries of the volunteer movement for the past two years, H. B. Sharman, Harlan P. Beach, W. J. Wanless, John L. Marshall, J. M. Broadnax, H. W. Luce and Robert E. Lewis.

4. The southern student conference.—Special responsibility has rested upon H. P. Andersen and myself for this gathering. After three most successful sessions at Knoxville, Tenn., it is now firmly established. Its influence as a unifying, training and inspiring agency among the southern associations can hardly be overestimated. The large attendance for the past two years has been made possible by the hearty co-operation of the state secretaries of the south and the special visitation of J. L. Marshall and R. M. Vaughan.

5. General executive work.—Over three months in the aggregate have been spent in office work and in interviews with association leaders.

In response to urgent appeals from the American students, Mr. Charles T. Studd, of Cambridge, England, has been spending his time since November of last year among our colleges. The arrangement of his tour has been in my hands. A deeper, stronger spiritual life among many of the students who have heard him has been the uniform result of his work.

I have also directed the tour of W. K. Matthews among the colleges of Alabama, Mississippi, Louisiana, Arkansas, Kentucky and Tennessee. Strong testimony comes as to the efficiency of the service rendered.

REPORT OF GILBERT A. BEAVER,

College Secretary.

The following summary of work covers the period of a year and four months, since September 1, 1895, when my official relation to the committee began :

Owing to the absence during all of this period of John R. Mott, the senior college secretary of the committee, a considerable part of the time has necessarily been given to general executive work. With the development of the intercollegiate movement work of this kind has greatly increased in amount and importance. Among the things contributing to this increase may be mentioned the growth and complexity of the student summer schools and of presidential and professional school training conferences; the attention demanded by the growing Bible work of the individual associations, and the multiplication of relations that must be sustained by the college department aside from those with the college associations. A fourth student summer school was established in California, and the others, at Northfield, Mass., Lake Geneva, Wis., and Knoxville, Tenn., were held as usual, with an aggregate attendance of over one thousand students.

The conventions and conferences personally attended include the Northfield and Lake Geneva student summer schools, the international secretaries' conference, the conference of college general secretaries, two conferences of the secretaries of the international committee, six state conventions, three presidential conferences and three professional school training conferences.

Ninety-one visits have been made to important institutions, mainly for the purpose of building up existing organizations. Six new associations, however, have been organized in professional colleges. In addition to direct visitation a personal relation has been maintained with many other college associations, principally in the large cities, through union student meetings and conferences with officers and committees, as well as through the regular training conferences and conventions noted above.

Important services rendered the college department by those who are not its regular secretaries are acknowledged by the general secretary in his report, and mention is made also of the changes in the college secretarial force since the last biennial report.

REPORT OF C. C. MICHENER,

College Secretary.

My report covers sixteen months from September, 1895, when I began regular work as a secretary of the International Committee. 1. Visitation.—During this time I have visited 104 institutions of higher learning in seventeen states, territories and provinces. The work has been mainly in the line of development rather than of organization. Three of these states had never been visited by a college secretary. In four others there had been no visit from a college secretary during the present generation of students. Ignorance of best methods and little practical touch with the great student world through intercollegiate relations calls for thorough supervision, and places upon the International Committee a burden of responsibility in providing that these institutions which hold such peculiar and vital relations to the future of these sections be regularly and carefully visited.

I have made three trips to the Pacific states, visiting many colleges *en* route; have co-operated with the field department, visiting seven city associations in the far west by appointment, and incidentally a number of others.

2. Organization.—I have organized associations in the following institutions: State Agricultural College of North Dakota, State University of Montana, Montana Wesleyan University, State Normal School of Washington, State University of Nevada, University of Arizona, State Normal School of Texas, Medical Department of Fort Worth University, University of Oklahoma, and the Oklahoma Normal School.

3. Conventions.—I have attended for two years the conventions in Manitoba and Nebraska and one year the conventions of Wisconsin, Minnesota, Iowa, California and the Pacific Northwest. I attended two district conferences in Iowa, and the district conferences of western Washington and British Columbia, and conducted the annual college conferences in both southern and northern California, Oregon, western Washington, and one comprising eastern Washington, eastern Oregon and Idaho. This last conference was the first intercollegiate gathering of any character ever held in this section of the continent.

4. Summer schools.—I have taken part in the supervision and administration of the college summer school at Lake Geneva, Wis. With the assistance of students and friends in that section, the first summer school for the students of the Rocky Mountain and Pacific states was held at Cazadero, Cal., in May, 1896. I also attended the student summer school at Northfield, Mass., the same year. In addition many details have been attended to, including correspondence, financial work, interviews with students and members of faculties, securing college men for the secretaryship, addresses, and help given at conventions and otherwise to the Young Women's Christian Association.

BIENNIAL REPORT OF C. J. HICKS, Secretary Railroad Department.

My time during 1895 and 1896 has been spent almost entirely in connection with the railroad department. During this period twenty-four new railroad associations have been added to the list, and only one has been discontinued, the department at Minneapolis. At Plattsburg the association has been reorganized and transferred from the railroad to the city department. This makes the total number of railroad associations now in existence 125. My work, in addition to a general relation to the entire field, has included attendance upon state conventions, visitation of associations, calls upon railroad officials in all parts of the country, and such correspondence and office work as could be attended to between trips. The office work has included the issuing of printed matter, pamphlets, etc., and the preparation and publication of a series of statistical and financial books especially for the use of the railroad associations. Also a general membership record. A marked advance in this department during 1896 was the employment of George T. Pettingill as stenographer and office secretary for the railroad department.

Some of the interesting developments, in addition to those included in the reports of Mr. Hamilton and Mr. Williams, are as follows :

1. On Union Pacific railway.—C. L. Gates has aided on this line. Pocatello, Idaho, has been reopened, and Grand Island, Neb., was helped to secure new quarters. Some progress has been made toward securing a new building at North Platte.

2. St. Louis building.—The task of securing the co-operation of twentyone corporations in the erection of a building, at a cost of \$75,000, for the railroad men centering at St. Louis has taken much time, and much still remains to be done although the co-operation of the leading lines has been secured.

3. In Canada.—(1) At the request of the general manager of the Grand Trunk railway a thorough investigation of that system was made and a report submitted containing recommendations as to the division points where railroad associations were needed. On the basis of this report the general manager asked for and received authority from the board of directors, meeting in London, England, to expend money in helping provide quarters for associations at the neediest points, and associations are already being organized at Chicago, Elsdon, Toronto, York and Richmond. In the preparation of this report, invaluable aid was rendered by D. A. Budge, general secretary of the Montreal association.

(2.) Some preliminary work has been done at two points on the Canadian Pacific railway.

(3.) In the Maritime Provinces an independent organization of railroad men, the railroad men's Christian association, has been for a number of years doing effective religious work. At the last convention of this organization it was unanimously voted to affiliate with the Young Men's Christian Associations. Thus the railroad men of Canada and the United States are now united in this movement.

4. In New England.—During the past year this work has been officially indorsed and financial support voted by the boards of directors of the Boston and Maine and of the New York, New Haven and Hartford railways.

5. Southern railway.—Mention was made in the 1895 Year Book of the report submitted to the officials of this road in 1894. Owing to the numerous changes of officials, and of division points, this work has been postponed from time to time, and the opening at Selma, reported by Mr. Williams, is the first tangible result growing out of that work in 1894. The definite policy of this important system will be to encourage the opening of the work at other points on its line.

6. The eighth international railroad conference.—This conference, held at Clifton Forge, Va., September 13-15, 1895, brought a great blessing to the 469 delegates in attendance, and resulted in great good to the entire railroad department. The report of this conference was issued in pamphlet form.

7. Evangelistic work of J. M. Burwick. - Since April, 1895, J. M Burwick, a freight conductor from the E. & T. H. R.R., has been on leave of absence visiting the railroad associations and unorganized division points. He has faithfully presented the gospel message to thousands of railroad men, and has been especially helpful in stimulating Christian men along the lines of Bible study and of earnest Christian living. The entire expense in connection with his work has been paid by the associations visited.

8. Growth in permanent equipment.—Each year railroad corporations are manifesting greater willingness to do their share towards providing wellequipped quarters for the railroad associations. Of the twenty-four new associations mentioned in this report, ten have started out in separate buildings especially erected or fitted up for their use. At a number of other points, sufficient funds have, been collected to insure new buildings in the near future. And it is seen with increasing clearness that hearty co-operation on the part of the corporation is so essential a condition of success that without it no fair experiment of the work can be attempted in justice either to the employees or to the work which they can unitedly accomplish for one another and for the betterment of the railroad service.

BIENNIAL REPORT OF EDWIN L. HAMILTON,

Secretary Railroad Department.

During 1895 and 1896 my time was given chiefly to the railroad associations in the central western states and to those on the line of the Chesapeake and Ohio railway. In addition to one or more visits to each point for conference with the secretary and committees, addresses at the Sunday meetings and anniversary services, I have assisted in organizing new railroad associations and departments at Youngstown, O., Brightwood, Ind., Boone, Ia., and Russell, Ashland and Lexington, Ky.

Aid was given in financial canvasses, for new buildings at three points: Mt. Carmel, Ill., where \$1,750 has been pledged by the citizens and railroad employees, the C. C. C. and St. Louis railway company agreeing to give double the amount subscribed by the men, and a \$5,000building is now in process of erection. At Corning, O., the Toledo and Ohio Central railway company agreed to give \$2 for every \$1 subscribed by the railroad men and citizens for a new building at that point, the company's contribution being limited to \$3,000; \$1,600 were readily secured by subscriptions, plans for a \$4,500 building have been approved, and the building will be erected in 1897. At the C. & N. W. railway shops. West 40th Street, Chicago, the Northwestern company agreed to give \$15,000 towards a \$20,000 building, provided the men would raise the remaining \$5,000. In four weeks' time, 1,300 men subscribed over \$5,600, and three directors of the company have given the site. Work on the new building will commence at once. In addition to the above, I have directed a membership canvass among the 1,600 railway employees centering at the Dearborn Station, Chicago, where the six railroad companies have agreed to remodel and furnish a four story brick building for the work of a railroad department, provided 450 of their employees would agree to become members of it. In about three weeks' time the required number was secured and the building is expected to be ready for use in April, 1897. At each of these points I have had the hearty co-operation of the state and local secretaries.

The blessing of the Lord has alone made possible the measure of success which has come to the railroad associations in the central western states, and the coming year promises to see greater extension on the lines of many of the western roads where the association has heretofore made but little headway.

During the two years covered by this report I traveled 68,064 miles.

REPORT OF H. O. WILLIAMS,

Secretary Railroad Department.

I entered the service of the committee July 1, 1895, and, with the exception of twenty-six days in August of the same year, my time has been devoted chiefly to the organization and visitation of the railroad associations in the eastern and southern states and Canada. Considerable time has been spent at both the New York and Richmond offices in routine correspondence, in arranging for the railroad conference held in September, 1895, and in preparation of printed matter issued by the railroad department under Mr. Hicks' direction. My work in the field may be described in part as follows :

1. New organizations.—At Camden, N. J., a department was organized in December, 1895, and very complete and attractive quarters provided by the Pennsylvania R.R. Co. At Concord, N. H., the Boston & Maine R.R. Co. co-operated with the men in securing and fitting up a building, and the work was organized there in February, 1896. The largest beginning ever made for a railroad department was by the N. Y., N. H. & H. R.R. Co., at New Haven, Conn., where the building was opened and the work commenced in December, 1896. I have had chiefly to do with working out the details of these organizations and with getting the work started. This has included many interviews with officials about appropriations and plans, with contractors about alterations and repairs, with the local associations about the form of organization and selection of committees of management, and with the men about lines of work to be undertaken.

2. Work being organized.—Work looking towards the organization of railroad departments where appropriations have already been secured has received my attention at Portland, Me.; Toronto, Ont.; Richmond and Point St. Charles (Montreal), Quebec, and Selma, Ala. At Toronto and Selma the quarters for the associations are now being prepared, and the departments, will soon be organized.

3. *Field studies.*—At the request of railroad officials a careful study has been made of the fields at Lowell and Fitchburg, Mass.; Erie, Pa.; Toronto Junction, Ont.; and Outremont, Que., and reports have been

made concerning the same, including the number of railroad men, residents and non-residents, kind of quarters needed, cost of repairs and furnishing, number of men who would become members, the annual budget and the monthly appropriations required from the railroad company.

4. Conferences and conventions.—I have attended two conferences of the secretaries of the committee, the international railroad conference at Clifton Forge, Va., the state conventions of Massachusetts and Rhode Island, and New Hampshire and Vermont in 1895, and of South Carolina, Virginia, New York, Georgia, Maine, and Massachusetts and Rhode Island in 1896; also the international conference of general secretaries at Cleveland, Ohio, and the dinner meeting in the interest of the work of the committee at Manchester, N. H.

5. Special work.—Much time has been given to visitation of associations for conference with secretaries, boards of directors and committees regarding the securing of new secretaries, retaining appropriations and aid in financial work, and also for anniversary occasions, gospel meetings, sociables and receptions.

About three weeks have been spent in assisting the state committee of Virginia in a financial canvass in which \$800 were raised. At the state conventions attended during the past year and a half I have secured pledges for state work aggregating \$5,200

I have made 176 visits to forty-one associations, and thirty-nine visits to seventeen unorganized points, in twenty states and the Dominion of Canada.

BIENNIAL REPORT OF GEORGE B. HODGE,

Secretary Educational Department.

My work for the past two years may be briefly noted under the following heads :

1. Study.—The nature of our department work demands a constant study of the problems concerning the needs of young men, the educational movements and tendencies of the time and the best methods, wherever and by whatever agency employed, through which the young men are being reached and their intellectual manhood developed. In this connection and in addition to the investigation of numerous educational facilities for young men in America, it was my privilege, without expense to the committee for the journey, to spend two months during 1896 in a study of the polytechnics and best evening technical facilities in England and continental Europe. The ultimate purpose in all this is to select the best methods and to recommend their adaptation to and adoption in the educational work of our associations.

2. Office work and publications.—Much time has been spent in the office in correspondence, conference with individuals, collecting and classifying information, preparing some important facts for charts and formulating the material for and superintending the publication of the following pamphlets: The Annual Reports for 1895 and for 1896, Awards and Reports, Educational Exhibits, Springfield Convention Papers, Practical Papers (these last two are papers on educational work read at the international gatherings of 1895), The Educational Director, Transatlantic Sidelights and the Prospectus for 1896, besides numerous leaflets and a variety of blanks and forms for international examinations, exhibits, etc.

3. Conventions and visitation.—Six international and state conventions and conferences have been attended and participated in. In thirty states and provinces one hundred and thirty visits have been made to eightyfive associations, for the purpose of stimulating and promoting the educational work. Sixty of these visits have been made with the committee's traveling exhibit.

4. Educational exhibits.—Much of the growth in interest and in the material advancement of the work as a whole is due to the educational exhibits. The international exhibits at the Clifton Forge railroad conference and at the Springfield convention; the state convention exhibits of New York, Ohio, Connecticut, Illinois, New Jersey, Massachusetts, Michigan, California and Canada, together with the local exhibits at the closing exercises of a great many associations, and the visits of the traveling exhibit above referred to, have served more than can be well estimated as much needed object lessons to inspire and lead associations into definite lines of educational work.

5. Local conferences.—With educational committees and boards of directors seventy-three conferences have been held; with individuals over six hundred. During the two years, aside from the trip to Europe, about half the time has been spent in the office, and the other half in visiting associations. During this time 42,000 miles have been traveled.

6. Standard courses and examinations.—Probably the most significant and far-reaching step yet taken by the department is the movement for establishing and maintaining uniform standard courses in our evening classes. It was officially inaugurated by the educational conference at the Springfield convention in 1895, and has developed into a three-fold plan: (1) the submitting of outline courses; (2) the holding of annual simultaneous examinations; (3) the granting of international certificates on successful completion of work. These certificates are already recognized by a number of higher educational institutions. An international board of examiners has charge of the courses of study and examinations. This movement more than any other one thing is to an encouraging degree raising the standard and efficiency of our educational work.

Note.—The complete facts and figures showing the condition and progress of the work for 1895 and 1896, respectively, may be found in the annual reports of the educational department for those years.

BIENNIAL REPORT OF LUTHER GULICK, Secretary Physical Department.

The Indianapolis convention, 1893, instructed the International Committee to take initial steps looking toward the organization of an athletic league. Upon report given by the committee to the Springfield convention, 1895, further instructions were given to proceed with and complete the organization as outlined at that time. This has been accomplished, and is the leading achievement of the last two years. It would appear that the league can be of chief service to the associations at present by: (1) The formulation of uniform gymnasium work, uniform examinations, grades and so on, in order that the weaker associations may have the benefit of working in the same way with the larger ones which have had more experience, as well as to facilitate the taking up of work in one association by men coming from another. (2) The formulation of uniform athletic and gymnastic rules and the keeping of athletic and gymnastic records of all kinds upon a uniform basis, so that they shall be comparable. (3) The management of such inter-association athletics and gymnastics as the associations themselves may desire. (4)The securing of low rates upon athletic and gymnastic goods for associations in the league. Large associations could always buy at low rates, so that this opportunity is not specially valuable to them, but it is useful to the associations in the smaller towns because they do not enjoy the benefit of much competition for their orders of goods. (5) The counseling with such associations in regard to the serviceable and useful apparatus. (6) The representation of association interests in other athletic bodies of the country in order that there may not be any of that interference with association gymnastics and athletics which in the past has been prejudicial to the work in a number of cases. (7) Emphasis upon that spirit of Christian courtesy which is in accord with the spirit of the whole association. There is sometimes danger that in the intimate and close contact which associations have with one another in athletics, a certain amount of friction will arise that is not easily done away with except by reference to some body not particularly identified with either group and the impartiality of which therefore would not be readily questioned.

These objects are all being measurably achieved by the league. To perfect its organization will probably take several years, as the securing of committees that are both intelligent and efficient is exceedingly difficult. In so far as possible, all steps are taken tentatively, so that the results of experience may quickly have their effect. The object sought, and the way in which it is sought, is novel in many respects, and it will not be possible to achieve results without taking steps the effects of which it is impossible to foresee.

A new epoch in the history of the physical department work was created by the publication of the Athletic League Hand Book, a 16 mo. book of 200 pages, in which is formulated, in addition to the constitution and by-laws of the league, a measurably complete set of athletic rules, pentathlon rules, scheme of marking for all standard athletic events, rules for gymnasiums, marching, dumb-bell drill, bouncing board work, horse, parallel and horizontal bar work, together with rules for basketball, minton and volley ball. This is the first time that as many matters regarding the physical work of the associations have been put into print together. A considerable fraction of them was put on paper for this book for the first time, others had been tested by the experience of years.

The gymnasium nomenclature which has been slowly growing during the past years has been made approximately complete through the efficient service of the physical directors' conferences and George W. Ehler, of Chicago, and is used in many associations.

Uniform examinations in elementary class work are being adopted in many associations, the results being reported to the athletic league. The men passing these examinations are given numbers which entitle them to enter such competitions as the associations may provide for them. In this way emphasis is thrown upon the class work of the local association, men being not allowed to compete in any event until they have passed this elementary class work.

Basket-ball, which originated in our associations, has been growing with the greatest rapidity during the past two years. It has been adopted very largely not only by our associations but by the colleges both for men and women, by athletic clubs, armories and schools. Careful judges estimate that in point of number of teams playing it ranks already second to baseball as a national game. The rules as formulated by the governing committee of the league are the national rules of the game. However, serious difficulties are arising in connection with it. Where teams have been formed without due attention being given to their government and control, in several cases they have become unmanageable and have left the association to form separate organizations. The problem involved is a large one, and there is as yet no unanimity of opinion as to how a settlement may best be made. The position taken by the governing committee is that there is a legitimate place for such competitions, but that it should be always subservient to the class work of the associations; that the men playing should be only those who do the regular class work of the association; that match and champion games should be minimized and games of a purely friendly character for sport should be increased, and that the formation of a league within a single association or the playing of games after class work by teams who are picked up for the occasion is of more advantage than the training and maintenance of a first-class team which shall represent the association.

The physical directors' conferences are being held in two sections, one in the east and one in the west. These are attended by leading physical directors, who discuss the more difficult problems which demand that intimate acquaintance with the work that cannot be found elsewhere. A number of the most advanced and helpful steps that have been taken in the work have been the result of the discussions on these occasions.

BIENNIAL REPORT OF CLAUS OLANDT, JR., - Secretary German Department.

During 1895 very little was done through visitation, although a few visits were made and some time devoted to correspondence, about two months altogether. In September the Buffalo German branch building, costing \$54,000, was dedicated. It is very complete and satisfactory in every respect. There are at present 800 young men and 200 boys in the branch membership. Eight Bible classes, besides other religious meetings, are being conducted and the spiritual results are excellent. During the week of prayer, 1896, over twenty young men were led to accept Christ. The three employees, secretary, assistant and physical director, were trained at the Springfield School.

The year 1896 has been a severe one for this department. Two associations were compelled to close their doors, largely on account of financial difficulties and lack of trained leadership. We hope that the suspension may be but temporary. During the year all the existing organizations were visited and some aid rendered. At one point a debt of \$5,000 was cancelled through the generosity of one man, and some money was secured toward the reduction of a mortgage debt in another place. At Philadelphia, in spite of an extension in the work, a floating debt was considerably reduced through the indefatigable efforts of Secretary Godtfring. The New York German department has taken full possession of its building, which had been remodeled at a cost of \$20,000, and the work at this important centre is more satisfactory and useful than ever before.

Aside from the time given to correspondence it has been my privilege to have personal interviews with a large number of German-speaking young men, fifty of whom were led to accept Christ. Other reports coming in indicate the year 1896 to have been one of special spiritual quickening.

BIENNIAL REPORT OF W. A. HUNTON,

Secretary Colored Men's Department.

During the period covered by this report, I made 209 visits to twentyfive cities and thirty-two colleges, in nineteen different states, from Connecticut to Louisiana and from the Atlantic coast to Texas.

I attended five conferences as follows: The international secretaries' conference, two conferences of members and secretaries of the International Committee, and two conferences of representatives of colored associations. These last represented unmistakably not only the increase in the number of associations in this department but also their satisfactory and in some instances their marked development. At Atlanta November, 1895, sixteen associations were represented by twenty-six delegates. This was almost wholly a college conference. At Hampton November, 1896, sixteen associations were represented by forty-one delegates, the majority of whom were from town associations.

There are now nineteen town and forty-one college associations in the colored men's department. Fourteen were organized during the past two years. By far the greater proportion of my time was devoted to the four associations in Washington, D. C., Baltimore, Md., and Richmond and Norfolk, Va. The other town associations received from two to five visits each. The Richmond and Norfolk associations are now permanent institutions, owning property free from debt, and are thoroughly established in the hearts of their constituents. It is confidently expected that the first new building for a colored association will be erected in Norfolk during the year 1897 at a cost of \$10,000.

Nearly four months of my time were devoted to work among students. Seven colleges were visited three times each, sixteen received two visits, and nine received one visit. Two-thirds of the colored universities, colleges and normal schools have organized associations, and these include nearly all the larger schools throughout the south. It is very necessary that these institutions be visited at least annually to awaken renewed interest and insure progress. For lack of time I have not been able to visit the other twenty or more schools in which organizations might be effected.

There are now seven secretarial points in our local work, namely, New Haven, Philadelphia, Baltimore, Washington, Richmond, Norfolk, and Louisville. Encouraging progress has been made, but it is almost painful to know of a score of large city centers that are ripe for organization. In some of these, in fact, temporary organizations have already been formed, but the limited force of the committee has made it impracticable to render the aid in visitation and counsel by which alone a vigorous association with a competent secretary could be established. While the entire field of work among the colored young men of our country is under the direct supervision of the International Committee, it is able as yet to employ but one secretary for this department. What association field in our country is to-day more needy and destitute ?

BIENNIAL REPORT OF C. A. EASTMAN, Secretary Indian Department.

The first part of the year 1895 was spent in visiting the associations in Sisseton Agency, S.D., and Santee Agency, Neb. During the spring I visited the associations in the Indian schools at Grant Institute, Genoa, Neb. ; Haskell Institute, Lawrence, Kan., and Bacone University, Muskegee, Ind. Ter., and attended the Texas state convention at Austin. In May I attended the international convention and the general secretaries' conference. During the summer I visited all the associations in the two Dakotas and Nebraska and in September attended the annual Indian missionary conference at Mountain Head, N.D. At the same time and place also occurred the general conference of the Indian Young Men's Christian Associations. Immediately following this I went east to assist in presenting this branch of the work to the public, visiting New York, Lake Mohonk and Boston for that purpose.

During the year 1896 much time was given to reorganizing and perfecting associations which had been formed by the Indian young men and aiding in the financial canvass of the committee. In June I attended the general secretaries' conference at Cleveland, Ohio, and in August and September went east again to assist in raising means for the support of this department.

The two important steps gained this year were the district conferences and the Indian summer school for Bible study. This latter step is so marked a gain that those who were most conservative in their views regarding our work have admitted that it is really progressing. It is of slow growth and requires much labor, but we are gaining ground and favor among both the Indians and our white neighbors. During the period covered by this report we have, although with much difficulty, sent one Indian young man to the Springfield Training School to prepare himself for work among the Indians.

From every point of view this department of the International Committee's work is growing and at the same time performing a kind of Christian service that is thoroughly missionary and practical.

BIENNIAL REPORT OF LUTHER D. WISHARD, Secretary Foreign Department.

The years 1895 and 1896 have witnessed greater progress in the foreign work of the committee than was made during the preceding six years. This has been largely due to Mr. Mott's recent remarkable tour among the students in mission lands and to the co-operation given him by the committee's permanent foreign secretaries. It was they who paved the way for Mr. Mott and his work in Asia. They stood by him at every step in the progress of his work, and they are wisely following up his tour by perpetuating the deep spiritual influences and the vigorous organization which accompanied it. The following summary of the general situation in foreign lands is too brief to serve except as a mere introduction to the history of these two eventful years.

Japan.—As a result of Mr. Mott's tour, the number of student associations now stands at twenty-eight. There are fully fifteen associations in cities. The Tokyo association building has fully demonstrated the wisdom of the men whose gifts made possible its erection. A strong national organization of students has been formed, which is the tenth national union admitted to the World's Student Christian Federation. Mr. Swift has happily recovered from a severe illness, and is prosecuting his work with his usual wisdom, devotion and tact. R. S. Miller, while largely occupied in the service of the United States legation in Tokyo as interpreter, has a wide margin of time to devote to the association work in the city.

China.—This great empire was entered by the committee's secretary D. Willard Lyon, in the autumn of 1895. Mr. Lyon was born in China, and the first twelve years of his life were spent there. He is now permitted to return to his native land to direct a movement which is destined to play an important part in the evangelization of that country, which has always been regarded as the Gibraltar of missions. Twentyseven student associations and one city association are now in existence. A national union of students was formed by Mr. Mott and Mr. Lyon during the autumn of 1896, which has been admitted to the World's Federation. Through the generosity of Mrs. J. Livingstone Taylor, the Tientsin association is now in possession of a new and commodious building. The funds for the lot were given by the young men of the city; the building was erected and furnished by Mrs. Taylor.

India.—The young men of Madras are eagerly watching the rising walls of their new building, the gift of John Wanamaker, who generously subscribed \$30,000 to cover the cost of the building. The cost of the foundations was subscribed by the young men of Madras. The lot was purchased with money chiefly obtained in England. The building will doubtless be occupied in the autumn. Mr. McConaughy is at present heavily laden with the three-fold work of directing the association at Madras, overseeing the erection of the building, and supervising the large and growing national organization. It is earnestly hoped that a substitute will soon be found for Raymond J. Davis, the recent general secretary in Madras, who was compelled, much to the regret of the committee, to return to this country last autumn on account of the serious condition of his health. Mr. Davis rendered valuable service in holding the work together during the enforced absence of Mr. McConaughy. It is believed that the return of Mr. Davis to this country will completely restore his health.

In Calcutta the student association will soon enter a large building purchased through the liberality of contributors in America and Eng-The building fund was secured through the efforts of David land. McConaughy and J. Campbell White. It will be occupied at an early day and will render possible the expansion of the work in Calcutta. which has completely outgrown the present limited premises. Dr. W. W. White, prominently identified in recent years with the student conferences at Northfield and Lake Geneva, and with Mr. Moody's Bible Training Institute in Chicago, has gone to Calcutta to engage in public and personal Christian work among students. Another important addition to the force of Indian secretaries is George S. Eddy, who was for several years previous to his departure for India connected with the leadership of the student volunteer movement in America. Mr. Eddy is associated with J. Campbell White in the college secretaryship of the Indian National Council. Through the work of the college secretaries it is hoped that a large part of the more than one hundred institutions represented at the series of student conferences conducted by Mr. Mott will have college associations. A student volunteer movement has been organized in India in close relations with the intercollegiate Young Men's Christian Association. This intercollegiate association has also entered the World's Federation.

Ceylon.—This field has also been entered, after long years of patient waiting on the part of the men who stood by the college and city associations formed there as a result of the work of Dr. Saunders in 1884. Louis Hieb, of Dickinson College, prominently associated with the work in the colleges of Pennsylvania, and later the successful general secretary of the metropolitan student association movement in Chicago, is now located in Colombo and is laying wise and broad plans for the expansion of the work throughout the island, which sustains such a strategic relation to the association and other missionary movements in the Indian empire.

Brazil.—The notable feature of the work in Brazil consists in the launching of a building enterprise through the liberality of Senor Braga, a prominent business man of Rio de Janerio, whose interest in the association movement is most pronounced. At least \$25,000 are needed from America to insure the ownership of this association building in the capital of Brazil. The balance of the money it is hoped can be raised in Rio de Janeiro.

In addition to the above special points concerning the situation in foreign fields, it should be said by way of summary that fully one hundred student associations are now in active operation in Asia and Africa and the mission fields of Europe. The number of city associations is fully as great. National organizations of students have been formed in Japan, China and India, all of which are united in the World's Student Christian Federation. Over one hundred of the leading educational centers of Asia have received thorough visits by American secretaries during the two years covered by this report. Nearly three thousand students from 200 colleges have been in attendance upon Christian conferences in India, Ceylon, China and Japan. Over two hundred professed conversions to Christianity are reported, and over two hundred students have volunteered to devote their lives exclusively to Christian work among their people. In addition to these lands where the committee's secretaries are permanently located, the associations have been stimulated in Bulgaria, Turkey in Europe, Asia Minor, Syria and Egypt by the visits of Mr. Mott. The associations in Persia, Kurdistan and Asia Minor have been helped as far as possible by correspondence. The associations of Kurdistan and Asia Minor have been seriously disturbed, and in some cases almost if not quite destroyed, by the horrible religious persecutions which have been inflicted upon the helpless Armenians.

The committee would take this public opportunity to express its deep gratitude to John Wanamaker for his great service in erecting the association building in Madras; to Mrs. J. Livingstone Taylor, whose generous contribution made possible the erection and equipment of the building in Tientsin; and to Robert S. Crawford and the other contributors in America and Great Britain whose gifts have put the student association in Calcutta in possession of its new and commodious building.

The foreign secretary was absent from America from July 20, 1895, to October 17, 1896, by permission of the committee and without any extra expense to its treasury. It was his privilege to participate in the British. German and Scandinavian student conferences in the summer of 1895. and to represent the student movements in mission lands in forming the World's Student Christian Federation in Wadstena Castle, Sweden, in August, 1895. In representing the students of mission lands at that memorable conference and bringing them into permanent relations with the students in Christian lands, it is believed a step has been taken which will usher in a new and important era in the great work of Christian missions. The heavy pressure of work preparatory to his long absence from America resulted in a physical collapse which called for several months of enforced rest and medical treatment. The closing months of his absence were occupied in visiting South Africa as a representative of the World's Student Christian Federation. During his stay there the leading educational institutions were visited and the South African student conference was held. It was attended by nearly five hundred students and teachers from thirty-one educational institutions. A national organization was formed with a strong executive. Donald Fraser, one of the most prominent leaders of the student movement in Great Britain, was detained in South Africa en route to his mission field on Lake Nyassa to attend the student conference. He was so impressed with the opportunity presented for evangelistic work among students that he decided to spend several months in such work before proceeding to his mission field. Over eight hundred professed conversions are reported in the schools of South Africa as a result of his visits. The South African Student Christian Association was admitted to the World's Federation.

The foreign secretary had the privilege during his residence in Scotland of enlisting the Scottish National Committee in a movement looking toward the support of a Scottish foreign secretary in India. Funds for the support of the man have already been secured, and as soon as the man can be found Scotland will be represented in the foreign association movement. He was also permitted to co-operate in enlisting Frank Anderson, one of the leading men of Oxford and one of the directors of the British student movement, in devoting his life to the student work in India. Mr. Anderson is now located in Bombay as the representative of the English National Council of the Young Men's Christian Associations.

Notwithstanding his long absence from the office, the secretary is happy to be able to report that the funds for the conduct of the foreign work for the years 1895 and 1896 were fully subscribed and the pledges were paid. This financial work was accomplished largely by correspondence from the foreign field.

The wide openings presented as a result of Mr. Mott's tour call for men. One man has already been secured, namely, Robert R. Gailey, a leader of the Christian work in Princeton, as well as the most prominent representative of that university in intercollegiate football. Mr. Gailey will go to the foreign field next autumn to devote himself to the student work.

The above is but a brief outline of the work of two years that have been crowded full of most interesting and efficient service in the great mission fields of the world, into whose Christian enterprises the Young Men's Christian Association has been called to perform a strategic service.

BIENNIAL REPORT OF DAVID McCONAUGHY, JR., Secretary for India.

Up to the time of leaving America, October 2, I had spent most of my furlough presenting the claims of our India work, both publicly and privately, in the home land. In addition, I took three post-graduate courses of study on comparative religion and the philosophy of religion in the University of New York, with a view to better equipping myself for the work in India. My attention was given principally during the early part of my furlough to securing funds for the Madras and Calcutta buildings, raising in all a little over \$60,000. From first to last that service was a continuous pleasure, and the result was an unbroken series of answers to prayer. Certainly more time was spent in waiting upon God for guidance than in actually following up the clues given. Having asked that He would incline the hearts of those whom He would have give the money for the buildings, and then guide my steps to them and enable me to represent the matter according to His will, I found the way all prepared. During the whole canvass I met with scarcely a refusal, in spite of all the talk about "hard times."

Messrs. Merrill & Cutler, architects, of Lowell, Mass., rendered invaluable service in the preparation of the plans, which occupied much of my thought during the last months before sailing.

After spending a fortnight in London, *en route*, I landed at Madras November 7. Meanwhile the general secretary, Mr. Davis, had been ordered home on account of sickness. The year 1896 severely tested the vitality of the Madras association, as during a very large portion of the year it was without the services of a general secretary. The board of directors, committeemen and the native assistant secretaries rose to a sense of their responsibility in such a way as to largely compensate for this serious deficiency. On my arrival, however, I found that more than one-third of the entire amount required for the year's expenses had yet to be raised during the last seven weeks of the year. The building business was also awaiting my attention. Arrangements were made for meetings every day at the three branches during the week of prayer for young men, which opened on the day of my arrival. No steps had yet been taken to arrange for the national convention, which was to be held in Calcutta the following month. The problem was to know what *not to do* first. One thing was certain, there was much need for prayer.

Besides thirteen meetings during the first week, I turned my attention first to getting the work begun on the building. The owners of two of the eighteen tin bazaars which stood on the front of our building site were still stubbornly holding out for an exorbitant price, and within a week of my arrival this had been advanced to four times as much as they had cost. After exhausting every effort, we gave ourselves unto prayer, and within a few weeks the answer came in the shape of a cyclone, which knocked down the bazaars, and likewise the price, so that we were able to buy these two remaining ones for what we had offered nearly two years before. Since then steady progress has been made, the site cleared and the contract let. The foundations are now proceeding rapidly. Tedious preliminaries have been disposed of, and we now expect to proceed with building operations without further interruption. Our site, which cost about \$9,000, was described by his Excellency, Sir Arthur Havelock, Governor of Madras, when laving the corner-stone last month, as "really magnificent." It fronts 150 feet on the open common of the city, extends back 125 feet on two side streets, and is surrounded by colleges and government buildings.

I went to Calcutta in December to assist in our fourth national convention. Being held at a long distance from the greater number of our associations it was not largely attended, but in many respects it was a memorable occasion. The relation of the student volunteer movement to our national union was satisfactorily settled. J. Campbell White was elected college secretary of the National Council and George Sherwood Eddy associate college secretary, it being understood that Mr. Eddy is to act also as the secretary of the student volunteer movement.

The total value of property has increased since the last national convention, two years ago, from 41,603 rupees to 427,019 rupees. There are now seven foreign general secretaries and seven Indian. V. S. Avariah has been secured as traveling secretary of the National Council, with headquarters at Madura, a chief center of the Tamil country, in South India. Private prayer and Bible study are being strongly emphasized throughout our associations great and small. "God is with us for our captain."

REPORT OF W. W. WHITE,

Secretary in India.

I sailed for Calcutta September 30, 1896, arriving December 24. The committee approved of a sojourn of six weeks in Egypt for work which was greatly blessed of God.

Since coming to India I have been engaged principally in work among

the college students of Calcutta. This is of a most interesting and promising character. I have just returned from attending the college student conferences at Poona and Madras, and start to-morrow for Lahore, where the third student conference is to convene.

I have spoken in various churches, and given Bible studies and addresses here and there at meetings of missionaries and Christian workers. No small amount of work is required in private correspondence growing out of addresses given.

The demand for private interviews is greater than can be supplied. This line of work one cannot easily report. It is believed to be very productive of good.

REPORT OF GEORGE S. EDDY,

Secretary in India.

Since reaching India November 17, 1896, I have been asked to become traveling secretary of the student volunteer movement for India and Ceylon, as well as associate college secretary of the Indian National Council. In addition to preparing for and attending the seven student conferences, my work takes me to the various colleges in India with the threefold object of: (1) Deepening the lives of the Christian students, and when possible organizing or strengthening a Young Men's Christian Association; (2) appealing to Christian students to give their lives to Christian work for the evangelization of India; (3) holding gospel meetings for all non-Christian students. The meetings thus far have been well attended, the students are accessible, and the prospects are as bright as the promises of God. Best of all has been His presence in the work. He is our confidence for India and for the evangelization of the world.

REPORT OF LOUIS HIEB,

Secretary for Ceylon.

I entered the service of the International Committee in September, 1896, on the 19th of which month I sailed from New York for Ceylon, where I arrived the first week in November. Twenty-one associations exist on this field in all stages of development, though not more than three or four, at most, are doing satisfactory work. In a tour of ten days among the student associations of the Jaffna peninsula, twenty students, mostly of Hindu parentage, accepted Jesus Christ. I attended the convention of the Indian associations at Calcutta, December 26-30. Since my return from Calcutta, I have devoted nearly all my time to the Colombo association, endeavoring to reorganize its management, and to stimulate its moribund condition.

We have been very happy in our work. God has been with us in every step and that has made the crooked things straight, and the rough places smooth.

BIENNIAL REPORT OF MYRON A. CLARK, Secretary for Brazil.

The work of your secretary during the years 1895 and 1896 has been almost exclusively that of local secretary of the Rio de Janeiro associa-

tion, the aim being to develop a strong center of association activity in the capital of the republic to serve as a model for all similar organizations in years to come. Three other associations have, however, been organized, in the cities of Sao Paulo, Campos and Pelotas, of which but meagre reports can be given. The association of Sao Paulo was organized August 1, 1895, and has at present forty-four active and fourteen associate members; it occupies rented rooms in the center of the city and maintains a reading and recreation room, and a Sunday gospel meeting; its membership is largely composed of students in the Theological Seminary and the Protestant College, and it has quite a struggle for existence. Its first year's expenses were about \$450, of which sum your secretary helped raise by subscription some \$250. The association at Campos, organized June 25, 1894, has done an active evangelistic work, but without any rented rooms, its members holding gospel meetings from house to house in the suburbs; it is at present in process of transformation, aiming to bring its constitution into closer harmony with the international plan. At Pelotas an association was organized May 27, 1896.

These two years have been of slow but steady growth for the Rio association, the religious meetings especially showing increase over the past years in their results. The Sunday gospel meetings have been held without interruption, and from them several young men have been led to the churches. Of our associate members sixteen joined the churches during this period, making public profession of their faith and becoming active members of the association. The week of prayer in November was duly observed each year with well-attended meetings and special sermons to young men in the churches, in which the association work was recommended to their attention. The membership of the association, reported as ninety-eight January 1, 1895, has grown to 158 January 1, 1897, ninety-five being active and sixty-three associate. Evening educational classes in Portuguese, bookkeeping, English and sacred music were maintained with more or less regularity during the two years, but lack of facilities and of capable organization rendered them far less valuable than they might have been. Statistics are given in the table below. The number of volumes in the library is 450, besides 200 magazines; and there are on file in the reading room fifteen periodicals. Seven outings, quite largely attended by members and friends, were conducted on holidays to various points of interest about the city, and were always occasions of much pleasure and profit. Of social meetings of special note mention need be made of but a few; our anniversary in July was fittingly observed both years, the rooms on each occasion being overcrowded, appropriate programs being rendered and refreshments served. Members' quarterly meetings were held in due season, each one with some special attraction and consequently crowded rooms. Watch-night services were held each year, that of 1895 being specially noteworthy, as from that meeting dates our building project. An address was made setting forth the advantages and necessities of a building and the members were asked to make small monthly pledges towards a fund for this purpose: the pledges signed that night amounted to about \$20, but untiring efforts in solicitation on the part of the committee increased these pledges, and from these and by other means, put into effect by this same committee, the fund has now grown to about \$1,500.

In March, 1896, Snr. José Luiz Fernandes Braga, one of the most interested patrons of the association, purchased at auction in the very heart of the city a fine unfinished building which he offered to turn over to the association at actual cost and on very easy terms of payment, himself to be the first to sign a subscription list, which later he did for \$2,000. This offer was, after due deliberation, accepted by the board of directors, and another friend, Mr. James L. Lawson, was secured to loan the money necessary to finish the building on the same terms of payment; he also afterwards signed the subscription list for a liberal amount. Months were now spent in amending the constitution and incorporating, a board of trustees being provided for to hold the property and finish at once the work on the building, a part of these trustees being chosen by the International Committee in New York. After other months of study on plans, contracts were let and work finally begun on the building in December last. A canvass for funds has been begun in Rio, and help is also expected from friends in the United States and England. The building is to be three stories in height and of pleasing appearance. On the ground floor are two large store rooms and on the first floor seven offices for renting purposes, the revenue of which is to help pay off the debt on the building. Until the debt is paid the association will occupy only the second floor, enlarging its quarters as the work increases and the debt decreases. We hope to move in by the close of the current year.

Though the efforts of your secretary have been largely absorbed during the past year in the building project, yet the general work has not seriously suffered, and if growth has not been larger, the general impression is that the work has for over a year past attained to the fullest proportions possible in the present quarters, which are small and unattractive.

The statistical table of the two years' work of the Rio association is appended :

	1896.		1695.	
Daily attendance at rooms		Average. 18	Totals. 7,507	Average. 21
Sunday gospel meetings	-	49	2,199	43
Weekly prayer meetings	746	14	634	12
Social meetings and receptions	. 757	25	1,058	42
Outings and picnics	. 92	30	117	29
Evening educational classes	.1,398	6	1,054	5

"THE HISTORICAL LIBRARY OF THE AMERICAN YOUNG MEN'S CHRISTIAN ASSOCIATION.

Report of J. T. Bowne, Custodian.

The library consists largely of publications of Young Men's Christian Associations in all lands, in twenty-one languages and dialects. Some attention has been given to the work of similar societies of young men and to individual effort in behalf of young men. These books, pamphlets, circulars, manuscripts and pictures illustrate the history and methods of work for their religious, moral, educational, physical and social welfare for upwards of two hundred years, and the collection is in many respects unique. No report has appeared in the Year Book since the close of 1892. Since that time ninety-one bound and ninety-five unbound volumes have been added, at the close of 1896 making 1050 bound and 1165 unbound, or a total of 2215 volumes.

The Young Men's Christian Associations very generally send us their publications. The total number of association periodicals received in 1896 was 145, 106 being monthlies, twenty-six weeklies, and the rest quarterlies and semi-monthlies. Europe sent 38; Asia, 4; Australia, 2; South America, 1, and North America, 100; the last including : Canada, 3; New England, 22; New York, New Jersey, and Pennsylvania, 34; Southern States, 15; Western and Pacific, 26. In 1890 the associations of the United States and Canada issued 212 different bulletins; since that time there has been a decrease every year, until in 1896 they number less than half those published six years ago. Here is food for reflection! The weeklies so popular about 1880 have been resumed in several of the larger American cities during the past year, the postal laws allowing of their delivery in the city where published at second-class rates. We have also received large numbers of other association publications, for all of which we heartily thank the donors.

Among a number of valuable additions, the following only can be noticed: From the Rev. Dr. Langdon of Providence, his international "traveling certificate" issued by the Central Committee of the American associations, September 15, 1856. It is lithographed on bond paper in French and English, and signed "H. Thane Miller, chairman." From Samuel Lowry of Cincinnati, a circular issued by the Central Committee in Philadelphia, June 12, 1860, announcing the recent removal of the office to that city, and referring to efforts to raise "an endowment fund" for the committee, the annual expenses of which were \$220; two others issued by the associations at Richmond and New Orleans in May, 1861, and sent to the northern associations, urge them to act as "peacemakers" in endeavoring to stay the progress of the civil war; also, a bound set of the Quarterly Reporter, the official organ of the Central Committee for the years 1856-57.

The solicitation of new publications from the associations of five continents, and the completion, classification and cataloguing of the sets already received, involve an amount of labor difficult to appreciate. The catalogue now covers some 23,000 entries, including a subject index of articles believed to have a reference value in the *Watchman*, *Young Men's Era*, and *Men* for more than twenty years. To the latter is being added, as fast as help permits, the topics discussed at international, national, and state conventions for the past forty years.

To the student of inter-denominational Christian work, or of sociology, during the past half century, or of any phase of our many-sided association work, this library offers a laboratory the value of which can hardly be overestimated, and it has been a great satisfaction to those having it in charge to see the growing appreciation of it. If space permitted, a number of testimonials might be given.

Advantage was taken of the opportunity afforded by the international convention at Springfield in 1895 to exhibit in the new association building some of the treasures of the library, several cases being filled with rare books and manuscripts, and some two hundred framed photographs of association buildings, conferences, and individuals shown upon the walls.

The demand from association and public libraries for aid in completing sets of state reports, leads me to urge state committees to send us at least five, or better, ten copies of each issue, and also to see to it *without fail* that the principal public libraries in their respective states are placed upon their mailing lists.

It is hoped that local associations everywhere will send to us, for historical purposes, at least two copies of each publication. Address Historical Library of American Young Men's Christian Associations, Springfield, Mass.

BIENNIAL REPORTS OF CORRESPONDING MEMBERS

1895-1896.

AUSTRALASIA.

The work in the colonies during 1895–96 has not been marked by great progress. No new associations have been formed. The visit of C. H. Yatman to Auckland, Sydney and Melbourne was so highly appreciated that at the triennial conference last June it was unanimously determined to urge his return to pave the way for the appointment of a traveling and organizing secretary. Such a permanent officer is sadly needed.

David Walker is still laboring in Sydney, E. A. Field in Brisbane, and the writer in Adelaide. W. A. Stewart has been appointed at Melbourne. J. B. Kevern has resigned Perth and the committee has asked that a new appointment be made. I am to go to Broken Hill next week to resuscitate the work there and am hopeful they may be able to engage a paid officer. I hope also to visit West Australia within a few months to organize work on the gold fields.

It is very difficult to leave my own field to organize work in other parts, the distances being so great. A magnificent opportunity offers and I sincerely hope we may be able to take advantage of it by placing a good man in the field as traveling secretary.

We have no national committee but hold a council meeting every three years. The secretary and treasurer is the only permanent officer and his work is honorary. The other officers are temporarily appointed during the sittings of the council.

The visit of John R. Mott was all too short. I had the privilege of being with him in two colonies during his stay. His addresses were a rich treat. He attended the conference in Melbourne. The best and most permanent benefit of his work was realized among the students in our universities and colleges. T. A. Bailey, from Ireland, also rendered excellent service on his way to India.

JOHN J. VIRGO, Cor. Mem.

FRANCE.

The national conference of France, held at Nimes in November, 1895, transferred the headquarters of the National Committee from Lyons to Paris, with Alfred André as president, and Em. Sautter as general secretary, two able and earnest workers whose active co-operation gave promise of great results. The sudden death of Mr. André on January 23, 1896, the one man in France above all others to whom, with James Stokes, of New York, we owe the impetus given in recent years to the formation in this country of associations on broad and influential lines, was a discouraging blow to the friends of the work ; nevertheless, the National Committee, trusting in God to lead, went resolutely to work and has made genuine progress during the year. Most of the real work of the National Committee has been done by its energetic general secretary, who gave up his banking business that he might consecrate himself entirely to the development of Young Men's Christian Associations in France. The associations have been grouped systematically, and the various district groups hold regular annual conferences, from which it is hoped much good will follow. Many of the groups also hold annual fêtes, which are attended not only by members but also by their families, so that, as a rule, the largest church buildings are required to hold the masses attending. The general secretary corresponds regularly with most of the associations, and has also during the year made visits to a large number, and his work has been ably seconded by the delegates in the various groups to the National Committee.

The National Committee has also recently taken in hand the publishing of *l'Esperance*, and intends making it a valuable medium for the dissemination of items of interest to our associations.

Our larger individual associations show decided progress. Paris received 328 new members in 1896, of whom sixty-nine were catholics. A large proportion of the members of this association consists of young men who come to Paris from the country districts or from other countries to learn business, or to follow special studies during two or three years only; so that notwithstanding the large accessions of new members, the number of those leaving is so numerous that the increase is only from 5 to 10% each year. One drawback to receiving larger accessions of members to the Paris association lies in the fact that numbers of young men in France, and in Paris specially, are unwilling to give up social immorality, a condition insisted upon by the association. The attendance at Bible classes and religious meetings shows a marked improvement over last year; a number of evangelistic meetings, led by Pastor Houter of Marseilles, were largely attended by young men, and several notable cases of conversion resulted.

Financially, the association still has to struggle to make both ends meet; the year closed with a deficit of nearly 4,000 francs, but this has since been covered by the special subscription of a catholic lady, who, having heard of the association, went to look at the building and became interested. This lady has also donated 600,000 francs for the foundation of a non-sectarian association for the protection of young women, and has requested some of the members of the general committee of the Paris association to organize and carry on this work. This must prove very satisfactory to James Stokes and those who have collaborated with him in the development of the Paris association.

Notwithstanding its splendidly equipped gymnasium, it was found difficult at first to induce members to become very much interested in physical exercises, but the able director, Mr. Rideout, has at last accomplished very satisfactory results and his classes are now well attended. Unfortunately, he is about leaving Paris, and it is exceedingly difficult to find the right man to be his successor. The committee despairs of finding one of French nationality. The restaurant continues one of the attractive features of the Paris association. The renting of furnished rooms to some fifty members having no relatives in Paris is also greatly appreciated. The ladies' committee, organized since my last report, is rendering valued service in furnishing these rooms, visiting the sick and organizing sociables for the entertainment of members.

The Lyons association has progressed noticeably during the last two years, having moved into new commodious quarters. The membership has doubled (being 190 on October 1, 1896), besides having enrolled 129 honorary members; a notable feature is that only fourteen members have left the association during the year. A restaurant was opened a year ago, and nearly 8,500 meals were served during the first year. The gymnasium in the basement of the building having become too small, a large hall has been hired outside which now gives ample accommodation. A marked increase of interest is also noticeable in the Bible classes, the average attendance of twenty-four members the first half-year having been increased to thirty-five for the last six months of 1896. A good share of the progress of this association is due to the fact that its general secretary, who formerly divided his time between the association and the national work, is now able to give all his time to Lyons.

The Rheims' association has also prospered since taking possession of its handsome new building.

The Marseilles association has been reorganized during the last year, our National Committee having sent its general secretary there for one month to assist in this work; subscriptions have been secured which will enable the association to move into more spacious quarters and support a salaried secretary as soon as the right man can be found for this post. The scarcity of Christian men, possessed of the necessary abilities to make good secretaries for our associations, is the greatest obstacle we have to contend with.

Owing to many visits by the national secretary, and the better organization into groups of the several hundred small associations scattered throughout France, considerable more interest is manifest than formerly, and on the whole the outlook is very encouraging.

L. P. TWYEFFORT, Cor. Mem.

GERMANY.

The last two years have seen, through God's blessing, a large outward and inward growth of the German associations. The number of them has been increased by 200 and is now 1,380. Christliche Vereine Junger Maenner have been organized at several new centers, such as Magdebourg, Hannover, Bielefeld, Coblence, Ulm, Nuremberg, etc. The "army work" has greatly developed. A Christian Soldiers' Alliance has been formed, the principal object of which is to establish soldiers' homes in the larger garrison towns. The *Soldiers' List*, issued by the National Committee for the coming year, shows the names of 2,530 association members now serving in the army.

A new territorial alliance has been founded called the Upper Rhenish Alliance, with headquarters at Karlsruhe, the capital of Baden. There are seventy associations belonging to it, which employ a traveling secretary of their own. The fourth national conference took place at Eisenach last year and made several important decisions. The national organization has been revised and put on a stronger and better footing. A national secretary has been appointed. The Christliche Vereine Junger Maenner have been granted a representative of their own in the national committee. Count Bernsdorff, of Berlin, has been chosen to fill this important post. As another encouraging fact it may be mentioned that the number of paid agents of the German associations has grown from thirty-five to fifty-five in the last two years, *i. e.*, five traveling secretaries and fifteen local secretaries have been added to the working force.

God has done great things for the association cause in Germany of late years, which fills our hearts with deep gratitude. The associations have not only grown in number but in spiritual strength. The young men themselves now take an active part in the work, which bears more and more an aggressive character. In consequence, the Christian public contributes larger sums to it than ever before. It is the earnest prayer of the writer that the associations in Luther's land will not only faithfully pursue their home work but will by and by do their share in winning the young men of the world for our crucified and risen Lord.

CHRISTIAN PHILDIUS, Cor. Mem.

GREAT BRITAIN.

"The best year we have ever had," was Sir George Williams' verdict upon the work of 1896, as expressed in his report presented to the National Council in December.

The two years which have followed since the memorable Jubilee gatherings in 1894 have witnessed considerable development of association work throughout our country.

The number of centers at which the work is represented has increased from 893 to 1,298; the membership from 87,464 to 98,899. Association building projects have been launched within the same period at nineteen centers, and the value of building property owned by the associations has increased from £379,695 to £479,525.

The staff of visiting and traveling representatives has been augmented by new appointments for the Midland Counties and for Wales, by the appointment of a Young Men's Christian Association evangelist, and by the enrollment of honorary visiting officers.

Individual associations have shown a marked spirit of enterprise in their membership campaigns, in the adaptation of their work to meet the varied needs of young men, and in a great increase of direct evangelistic effort on their behalf.

Prominence has been given to efforts in the form of demonstrations against the prevailing evils of infidelity, intemperance, impurity, betting and gambling.

In many towns from fifty to one hundred special sermons to young men have been preached from as many pulpits on each occasion of the observance of the week of universal prayer.

Testimony to the great usefulness of association work has been borne by many public men in the state as well as by leading representatives of the churches.

The half-yearly conferences of the several district unions have brought together large numbers of association workers and the discussions which have taken place have been of a throughly practical and helpful character.

The British conference of 1896, held at Derby, was the largest and most

representative gathering of this description ever held. The earnest spiritual tone which characterized the proceedings at the different meetings gave an impetus to the work throughout the land.

Provision has been made in the organization of the English Union for the admission of auxiliaries, whereby the associations are enabled to cooperate with a large number of associations, composed of Christian soldiers, who are making their influence felt throughout the British army.

The Christian student work of the country, as represented by the Student Volunteer Missionary Union and the British College Christian Union has also been linked with the Young Men's Christian Association. These unions now appoint representatives on the National Council.

A first fruit of the closer union of the last mentioned organizations has been the sending of a Christian student worker to India in the person of Frank Anderson, B. A., of Exeter College, Oxford, who will henceforth represent the English National Council in work among the educated natives of India throughout the Bombay Presidency.

W. H. MILLS, Cor. Mem.

HAWAII.

The association in Honolulu is in a flourishing condition. Since the completion of the gymnasium, late in 1894, at a cost of \$18,000, the membership has greatly increased. It is now about five hundred, of which some three hundred are associate members using the gymnasium and other educational facilities.

In the fall of 1895 C. H. Yatman conducted a series of evangelistic meetings in the hall, and at their close raised some \$3,000 by volunteer subscriptions towards the debt on the gymnasium, which now stands at \$2,000.

The early evening meeting on Sundays is remarkable for uniformity of attendance and spiritual fervor. Religious services are conducted every Sunday at the jail in three languages, English, Hawaiian and Chinese. The reading room has an average daily attendance of about one hundred. Five evenings in the week are devoted to educational classes, where shorthand and typewriting, bookkeeping, elementary English, Hawaiian and vocal culture are taught.

A visit in July, 1896, from Mr. James Stokes of New York gave us much encouragement.

Since D. W. Corbett's resignation Mr. Bluxome has been in charge of the work. H. E. Coleman of Marion, Ind., has been secured as permanent secretary and is expected to begin work January 1, 1897.

A. F. JUDD, Cor. Mem.

INDIA.

I take much pleasure in forwarding my biennial report for the years 1895 and 1896. Detailed reports will undoubtedly reach you from the usual sources; I wish briefly to allude to the conspicuous facts in connection with the growth of the Young Men's Christian Association in India during these two years. The secretary of the Indian National Union was absent in America on furlough during the larger part of this period. This possibly accounted for the less than usual activity in the direction of national work; but individual associations in our larger cities have been strengthened and enlarged very considerably. Conspicuously is this the case in the capital city, Calcutta, where a college Young Men's Christian Association has been established and an excellent building secured. Madras is also just now rejoicing in the immediate prospect of a magnificent building. Bombay has a building of its own, but the secretarial force in this city has been much augmented, as also in Calcutta and in Ceylon. The number of secretaries now on the field is larger than ever before and the outlook for aggressive work of that nature which characterizes the Young Men's Christian Associations of England and America is now brighter than ever. WILLIAM I. CHAMBERLAIN, Cor. Mem.

CANADIAN WEST.

It is with much thankfulness that I am able to give the following report of the work in this part of the Dominion.

At the time of our last report the Brandon association was about to succumb because of a floating debt of \$1,300, the Winnipeg association was carrying about half as much, and the provincial committee was weighed down with a debt of over \$700. By God's grace all these have been cleared off and the work throughout the province has developed, largely on the basal lines of Bible training and personal work. We have added four men's meetings to our list and have now eight associations three town, four college and one Indian—and also six men's meetings in places not yet organized. During the vacation members of the college associations held meetings at twenty-nine points. The intercollegiate association looks after four lumber camps at which regular meetings are held.

We are planning to organize several portions of the province into district work this year, and are making the distribution of religious literature a special feature. Our provincial secretary, John Smith, is wonderfully successful in reaching men and bringing them into active personal work for their fellows.

We do most sincerely thank the International Committee for the very great blessings which have attended the visits of Field Secretary Copeland and College Secretary Michener during the year, and we are glad to know that your committee received several hundred dollars towards its great work from this sparsely settled field.

Winnipeg hopes to begin active operations on a building this year.

ROBERT D. RICHARDSON, Cor. Mem.

NEW BRUNSWICK.

We have at present on this field twelve associations—seven city and town, two college and three railroad—and eleven corresponding members. There are five general secretaries and one physical director. Nine members of the Maritime committee are located in this territory. The railroad department secretary for our provinces, John C. Moore, makes his headquarters at Moncton. Last year railroad associations were organized at Moncton and Campbellton. The St. John Association leads the province in educational work. Chatham is working well on small capital. Fredericton has a strong association. College associations are in successful operation at the University of New Brunswick and Mt. Allison University. An evangelistic campaign is now in progress at the latter. The border town association, St. Stephen, is alive and holds the chairman of the Maritime boys' work committee and leader of the Maritime camps. There are six boys' branches on the field and large representations will attend the coming boys' conference in Amherst. There are six women's auxiliaries or committees. Dorchester and other points are agitating for organization. Woodstock is to embark on a building venture in the summer. Special evangelistic work was conducted by Evangelist Gale in St. John and Moncton. God's hand has been in the work. There has been a drawing together of the workers and greater unification of the whole field.

W. S. MORRISON, Cor. Mem.

NOVA SCOTIA.

Steady advance has been made during the past two years. Six new associations have been organized, Glace Bay, Milton, Parrsboro, Little River, Kentville and Truro (railway). The railroad work has been growing. Last year closer affiliation was sought with the Maritime committee; this year at the Montreal railway men's convention the whole work among railway men in Canada was by vote affiliated with the work of the International Committee. A traveling railroad secretary is employed for the Maritime Provinces.

The New Glasgow association has just completed and dedicated its \$10,000 building. Port Morien has a fund secured for enlarging its present building. Sydney is agitating for a new building, in a central location, and has recently added thirty-five members. Yarmouth is negotiating for the purchase of a property to be remodelled for association purposes.

Corresponding members are being secured at points where no associations exist. The last two conventions were held in Nova Scotia In 1895, at Halifax, the international representatives present were George B. Hodge and W. B. Millar. Mr. Hodge also visited several of the associations with the educational exhibit, stimulating this feature of the work very much. The convention of 1896 was held in Pictou, F. S. Goodman, state secretary of New York, representing the International Committee. The first Maritime summer school for Bible study met in Halifax, August, 1895, but was not an unqualified success. "Young Men's Sundays" have been held in a number of towns and villages.

The work in the colleges has made progress. The intercollegiate conference held in Halifax November, 1896, was one of the strongest in the history of this work. H. W. Georgi of the International Committee was present and rendered valuable help. Work among militia men was undertaken with good success both years. The junior work has been pushed in many ways. A separate Maritime boys' conference is announced for January, 1897. The Maritime boys' camp had 118 in attendance. Halifax and other boys' branches sent out separate camps as well. The work for lumbermen was first attempted in an effective way last winter. The physical work is opening up well. The pentathlon contest has done much to show that our association men are able to stand with any in physical excellence.

There is an increasing amount of Bible study. The Maritime committee that supervises the work in this field paved the way for a visit to many of our Nova Scotia association towns of H. L. Gale, the evangelist, whose efforts were attended with many conversions. The regular work of the associations in the religious department has been very fruitful in results.

A paper called *The Lever* has been issued, which, together with much other literature, has made the work fully and widely known, and it is consequently better supported.

J. C. MACKINTOSH, Cor. Mem.

ONTARIO.

The work in this province has made good progress in most departments, especially in Bible study and educational work.

Associations have been organized at a number of important points. Several buildings have been erected or are in course of construction.

The railway department has received a new impetus since the advent of Chas. M. Hays to the management of the Grand Trunk. The International Committee has given much time in planning for branches at important railway terminals.

The college associations are prosperous. Boys' work is made a prominent feature in some places with gratifying success.

Looking at the work as a whole we have much reason to thank God and take courage.

JOHN J. GARTSHORE, Cor. Mem.

PRINCE EDWARD ISLAND.

In this province the work does not make much progress. There are but three associations, city organizations at Charlottetown and Summerside and a college association in Prince of Wales College. Last year the Charlottetown association did little except keeping its reading-room up to its usual high standard of excellence. The officers recently elected, however, are taking hold of the work with spirit and determination. A mid-week prayer meeting has been started, and the mangement is trying for a more distinctly religious work among young men. The Summerside association is not doing much work.

J. D. SEAMAN, Cor. Mem.

QUEBEC.

In this province there has been no increase in the number of associations, Quebec, Sherbrooke, Montreal, and the college association in McGill University being the only organizations at this date. Corresponding members, however, have been secured in a number of villages, and these have been provided with lists of secretaries on this continent, so that young men who leave their sections are able to secure letters of introduction to associations in the cities where they may take up their residence. This has been a very helpful work, and one which must produce good fruit. There is also a generally increased interest in the work among young men. Through the efforts of the railroad secretaries of the International Committee, aided by local co-operation, the officials of the Grand Trunk railway have decided to introduce the association work at a number of terminal points. In this province Richmond and Montreal will have railway men's organizations within another year, as steps are now being taken to bring this about.

The association in McGill University has secured a building of its own and has had an excellent year.

WILLIAM TEES, Cor. Mem.

ALABAMA.

The Alabama associations are with few exceptions doing splendid work. Mobile has raised the \$30,000 required to bind all the pledges for the new building. The college work is in very encouraging condition, and those associations which sent delegates to the Knoxville student summer school are making the greatest progress. Our first railroad association has just been organized at Selma, through the help of the International Committee, and the interest and encouragement of the Southern railroad. It starts out with over two hundred members, in nicely furnished quarters. and with the prospect of doing a splendid work among the railroad men. The financial condition of the state work is better than for many years, and we are hopeful of closing the year free of debt. L. E. Buell of Missouri, who recently became our state secretary, is proving himself a very efficient man for the work. We are greatly indebted to the International Committee for the generous services of Field Secretary H. P. Andersen who has promptly and intelligently answered every call made upon him, and we are looking forward to the meeting of the International Convention in Mobile, April 21, 1897, with great pleasure and interest.

HARRY HAWKINS, Cor. Mem.

ARKANSAS.

Our state has been without a permanent traveling agent during the past two years. We have, however, been fortunate in securing Secretary Cecil L. Gates, of the international force, for a part of the time, and his ripe experience and good judgment have been of great service. We now have six associations in our state. Some of these have been greatly hampered by indebtedness, but with the hearty co-operation of the boards of directors and general secretaries the almost hopeless task of raising current expenses, reorganizing committees, increasing the membership and improving the service has been accomplished, and our associations are now well up to the average standard of the country at large.

Our annual conventions have been quite well attended and much good work has been accomplished at them. The following recommendations made by the executive committee have been adopted and to a considerable extent have been executed: (1) Careful college visitation to be undertaken; (2) young men's prayer meetings and Bible classes to be established; (3) educational work to be encouraged; (4) young men's days to be held through special visitation; (5) results along religious lines to be multiplied; (6) the plan for securing corresponding members at towns where there are no associations to be continued.

FRED. Fox, Cor. Mem.

ASSOCIATION BUILDING, SAN FRANCISCO, CAL. OCCUPIED SEPTEMBER 9, 1894. Cost, \$330,000.

Population, 350,000.

Dimensions, 87 1/2 x 187 1/2 feet. Wing, 50 x 50 feet.

CALIFORNIA.

In common with others we have felt the stringency of the times and been obliged to curtail state work in many directions. 'yet, notwithstanding, a fairly good work has been accomplished. The state conventions and district conferences have been regularly held, and the first summer school for Christian workers on the Pacific coast took place at Cazadero in May, 1896, under the direction of the International Committee. C. C. Michener, one of the international secretaries, did the preparatory work and presided. It was a splendid success in every particular, and as one result Stanford University association raised over \$500 to assist in missionary work in India. The school gave great impetus to Bible study throughout the colleges of the Pacific states.

One building has been lost, that at San Jose, but there are still hopes of redeeming it. State Secretary John L. Speares has at his own request been given a leave of absence for eight months, to assist the local work at Redlands with the hope of saving the building there. This will relieve the state committee, which is about \$1,500 in debt, and every effort will be made in the near future to wipe this out.

The San Francisco association raised \$100,000 toward the debt on its property during the past year, all of which has been paid in. This relieves the association of a great financial burden. There is still quite a large sum to raise; but it is hoped that the value of the old property, which is not yet disposed of, will be enhanced with returning prosperity, and thus diminish the amount necessary to be secured by subscription.

Notwithstanding the financial embarrassments and drawbacks in other directions, the association cause has a strong hold in the state, and its friends and supporters are constantly increasing in number.

H. J. McCoy, Cor. Mem.

COLORADO.

The association work in this state is on a more solid foundation than ever before. We now have four college, one railroad and five town associations, employing six general secretaries, four physical directors, one educational director and three assistants.

The Denver association has continued to grow in favor with the business community and exerts a far reaching influence in the state. Special attention has been given to the educational work and an employed director has been in charge for the past year. The association at Colorado Springs has received a legacy of \$5,000, as a nucleus for a building fund. Arrangements have also been made with one of their business men for the erection of a building especially adapted to association work, which will give them the finest rented rooms in the country. Canon City association has entered a well equipped gymnasium, and both Pueblo and Durango have enlarged the work of their physical departments.

By the consolidation of Tillotson Academy with Colorado College we have one less college association, but the work is fully as effective. Through the efficient service of State Secretary W. G. Lotze, a much needed work is being carried on in our mining camps by corresponding members and the state work is systematically prosecuted. Co-operation has also been received from the International Committee. A most important movement is the establishment of a summer camp at Glen Park for the accommodation of the large number of semi-invalid young men who come to Colorado every year, and also a college conference and Bible school, which will be held during August, to accommodate the large number of college men and Christian workers in the Rocky Mountain region.

JOHN R. SCHERMERHORN, Cor. Mem.

CONNECTICUT.

Despite many untoward circumstances progress has been made in some directions and in no particular have we retrograded. We have the same number of associations, twenty-six; an increased membership, now approximating nine thousand; daily visits to the rooms averaging nearly three thousand, and fully one thousand members serving on committees. Initiatory steps have been taken towards the organization of several new associations.

We have twelve association buildings valued at \$731,000 and other property and building funds paid in valued at nearly \$100,000. Four associations have endowments aggregating \$75,000; the annual current expenses approximate \$80,000. The new building at Norwich will be ready for occupancy in June. It is a handsome structure of six stories and well adapted to all the modern methods of association work.

The interest in Bible study has steadily increased, and a new interest has been awakened in our Sunday services in many associations, increasing the attendance and producing good results. Our educational work still maintains a high standard of excellence and is more and more appreciated. Over one hundred evening classes are sustained, with an average attendance exceeding eight hundred. The 106 weekly gymnasium classes are also well patronized. The four college associations in our state are doing a better work than ever before. Between forty and fifty paid officers are employed. Longer terms of service by our general secretaries are greatly to be desired.

The state is divided into five districts, efficiently officered and with one hundred corresponding members distributed over the entire field. Excellent fruit has already come through this organization and through it we expect greatly to enlarge our constituency and awaken a widespread interest in association work.

The tactful work done in our military encampment at Nantic has served to popularize association work among military officers and men. We owe the prosperity of the work in our state in great measure to the untiring zeal and efficiency of State Secretary E. T. Bates.

W. R. BURNHAM, Cor. Mem.

GEORGIA.

The work in Georgia for the past two years has been rendered difficult through the general financial stress which has prevented the organization of new associations. Under the very able supervision, however, of W. M. Lewis, our state secretary for the past four years, and with the co-operation of the state committee, our local organizations have been greatly strengthened, and are doing better and broader work on established association lines than ever before. The associations have a strong hold upon the confidence and support of the people, and the outlook appears in every way favorable for a well organized and increased work in the immediate future.

We now have twenty-three associations in the state; ten city and town, one railroad, and twelve college and school, with a total membership of 3,661. Six associations own buildings with a total value, including furnishings, of \$231,795. Three of the buildings have small debts upon them aggregating about \$24,000.

The state committee has uninterruptedly taken an active oversight of the work, has paid its way, and will close the year without debt.

The relations between the state committee and the local associations are most cordial, and State Secretary Lewis meets with hearty co-operation in his labors.

By the present arrangement Mr. Lewis divides his time between Georgia and South Carolina in the proportions of two-thirds to Georgia and one-third to South Carolina. With the growth of the work in this state it will probably soon require the entire services of a secretary.

The state committee would express its appreciation of the valuable assistance received from the International Committee, especially in the hearty aid given at our conventions.

J. FRANK BECK, Cor. Mem.

ILLINOIS.

I shall not attempt to deal with any figures in calling attention to the events of the past two years. The statistical reports, found elsewhere, will tell their story. Life is essential to activity, and it is with great gratitude that it can be recorded that the stringent financial conditions which have prevailed during the last two years have not resulted in the loss of any material ground for association work in this state. All city associations and departments have been held. The state committee closed the fourth consecutive year, ia which its cash receipts equaled the cash expenditures. This result was only obtained, however, by most painstaking and persistent efforts. The burden fell most heavily upon the secretaries themselves, although some of the members of the committee were the means of securing financial assistance for its work.

A gratifying improvement is being noted in the Bible study carried on in the associations. In the small town association work, the value of efficient supervision is noticeably apparent. Since the first of the year many applications for organization have come to the state committee. Illinois may be considered thoroughly committed to the wisdom of the small town associations. Admitting that dissolution frequently follows after a time of earnest work, the results accomplished during the time of activity in affecting the lives of young men have in so many cases been satisfactory and permanent that longevity of the association in the small town has ceased to be an essential test of its real success.

Building movements have naturally been hampered. A building has been finished and dedicated at Pana. The necessary fund has been pledged for Galesburg, and it is hoped that the pledges made for building at the University of Illinois at Champaign can be made available for a

somewhat smaller building than was at first contemplated. A building fund has been growing steadily at Evanston. The noticeable development has been in connection with railroad association possibilities, largely as a result of earnest efforts by the international secretaries in co-operation with representatives of the state committee and the Chicago association. The careful attention of railroad managers has been secured and certain buildings are assured. Some of the directors of the Chicago & Northwestern railroad company will provide a lot and the company determined to invest \$15,000 in a building, if the men would raise \$5,000; \$6,000 has already been pledged by the men. The railroads using Dearborn station in Chicago as a terminal have united in providing a fund for fitting a building and providing a satisfactory sum for maintenance for a term of five years, and a railroad secretary has been called and is upon the ground. The Chicago & Grand Trunk has offered to provide half of the necessary expense for quarters at Elsdon, a Chicago suburb, if the men or friends will raise the other half. The "Big Four" set apart a sum for quarters at Mt. Carmel, and the men have pledged more than was expected. The sympathetic generous response by the railroad men is as encouraging as the recognition by the companies of the value to the men of the privileges of association quarters and activity.

The 1895 convention was held at Evanston, the home of the Northwestern University, the great college under the auspices of the Methodists. The convention program was strong and helpful. The building fund was one of the local results.

The 1896 convention was held at Sterling, and was marked by a spirit of deep earnestness. For faithful attendance of the delegates and interest in the proceedings of the convention and consequently in its value to those in attendance, it is perhaps at the head of those which have been held in this state.

The summer gatherings for college students and others at Lake Geneva have been very successful and an inestimable blessing to those who attended them. The International Committee, through its secretaries, Messrs. Brockman, Hicks and Hamilton, have given help at needed points, and Mr. Weidensall, known to and loved by all association men, has given much effort to forward Bible study.

The past two years have given deeper assurance of the efficiency and permanency of Young Men's Christian Associations, have given new evidences of devotion and self-sacrifice among the secretaries, and warning both to the secretaries and the members of the dangers which lie in letting the associations become "institutions" depending more upon the secretaries than voluntary efficient work by members.

ARTHUR D. WHEELER, Cor. Mem.

INDIANA.

There has been steady development in every department of our work during the two years, notwithstanding the business depression. Every secretarial point and every college association was represented at the last convention, November 1896, when 277 delegates were present, making it next to the largest in our history, and in many respects the strongest. We have pulled through without the loss of any one of our thirty associations, and with the gain of one small town organization.

There are now 6,961 members in the state, an increase of 1,300 in the two years. A little more than one-half are active members, and over one thousand serve on committees. The annual current expenses for the past year were \$56,092, and the total value of buildings and other real estate is \$323,600. In this connection is the remarkable fact that the total indebtedness on all property is less than 9% of the value, considerably less than when the panic began.

Only four buildings have debts now unprovided for. This change is chiefly due to the splendid campaigns at Crawfordsville, Evansville and New Albany, rescuing those fine buildings from threatened disaster and leaving the last two entirely out of debt. Bible class sessions reported for 1896 were 1,290, and young men's gospel meetings 1,326, with total average weekly attendance of 1,108, while 327 professed conversions among young men were reported in connection with regular meetings. The average daily attendance at rooms at fifteen points was 1,999.

The organization of the state work itself has been still further strengthened, and the adoption of the vice-chairmanship plan, making George W. Wishard chairman, and L. H. Wales vice-chairman, increases the working efficiency of the state committee.

We now have seven standing sub-committees—sub-executive, finance, railroad, college, endowment, athletics, and advisory. We added an assistant state secretary during the past year to devote his time largely to college work, thus giving us a force of three men. This necessitated the largest budget in our history, \$5,600, but it was entirely raised and all current expenses of the year met.

From the International Committee we have received occasional valuable co-operation, especially from some of the college and railroad secretaries, and from Messrs. Morse, Wishard and Ober.

O. M. GREGG, Cor. Mem.

IOWA.

Progress has been made in Iowa during the past two years, in spite of the fact that financial depression has hindered building enterprises and plans for extension.

The railroad department at Marshalltown has entered its own home. The Burlington association has begun the erection of the gymnasium and auditorium section of its building. The following statistics show the comparative growth of the past seven years :

	1889.	1896.
Members of associations	4,277	9,382
Active members	2,102	4,609
Associate members	2,175	4,773
Members serving on committees	702	1.143
College associations	16	24
Corresponding members	86	250
Evening educational classes	10	101
Men enrolled in educational classes	125	954
Men enrolled in Bible classes	253	1,162
Attendance at men's meetings.	1.018	1,886
Professed conversions	138	816
Gymnasiums	7	20

Paid employees	18	38
Associations employing secretaries	13	21
Buildings	1	9
Spent for current expenses	\$31,917	\$60,484
Value of buildings.	40,000	380,000
Tarte of Suttemport		

The assistance and counsel of the International Committee has been much appreciated.

M. H. SMITH, Cor. Mem.

KANSAS.

A decided improvement is noticeable in this state. For the first time in several years the executive committee has reported all indebtedness paid. Our state secretary, Andrew Baird, has succeeded under discouraging conditions in giving the association cause a new impetus.

There are ten city and sixteen college associations with two railroad departments. The college associations are all doing well; one-half of the city associations are making exceptionally good progress, while the other half are at least holding their ground if not gaining. The railroad department at Topeka has had a remarkable growth. The A. T. & S. F. railway company has been generous, and the department now numbers over six hundred members, with no indebtedness.

The convention for 1896, held in Leavenworth, was well attended and was a deeply spiritual and very profitable meeting. R. A. Torrey gave several excellent Bible readings which were greatly appreciated. C. L. Gates and R. M. Vaughan represented the International Committee.

The work in the state is being reorganized and strengthened along all lines and there is every reason to expect a steady growth and uplift during the coming year. The sum of \$3,083 was raised and expended last year for state work.

J. B. LARIMER, Cor. Mem.

KENTUCKY.

The years 1895-96 have witnessed internal development as well as external growth in the Kentucky associations. While they have been, in some respects, the most trying in our history, they have been years of marked achievement. There are now thirty associations in the state, most of which are well organized and equipped. There are fourteen town, eleven college, one army and four railroad associations. Twentyfive men devote their entire time as secretaries and physical directors, a net gain of five in the past two years.

The building movement in Kentucky may properly be dated from 1895. The Owensboro association purchased a \$7,000 lot, and has nearly finished a handsome \$25,000 building. Louisville possesses a fine property, 156x212 feet. The price, \$40,700, has been paid in full, and when the gymnasium and auditorium are erected a splendid equipment will be provided.

The college work has shown much activity A state college conference held at Georgetown, late in 1895, had a marked effect upon this department. Valuable service has been rendered in visitation by Messrs. Brockman, Michener, and Matthews, college secretaries of the International Committee. The visits of Chas. T. Studd, of England, greatly intensified the spiritual life and activity of the college associations.

The railroad work has shown considerable prosperity. New associations have been established on the Chesapeake and Ohio R. R. at Russell, Ashland and Lexington. The Russell association occupies a beautiful building, costing \$6,000, erected at the expense of the railroad company. Railroad Secretary Hamilton, of the international force, materially contributed to this extension.

The religious work of the association was never more strongly emphasized. More money is being spent in its prosecution, more young men are attending the religious meetings and Bible classes, more young men are being won for Christ. Our associations are more than ever true to their proclaimed object: "The extension of Christ's kingdom among young men."

J. A. STUCKY, Cor. Mem.

LOUISIANA.

Association work in this state has merely held its own during the past two years. Centenary College reports its work in good condition. At the State University many young men are being trained in Bible study. Baton Rouge still maintains its organization but is not doing much active work, and its membership is small. Straight University reports a membership of about fifty and is doing a quiet but earnest work in developing Christian character among its young men.

The association at New Orleans having completed its commodious and finely equipped building dedicated it January 1, 1896, since which time its membership has more than doubled, and efficient work is being done through its religious meetings, reading room, educational classes, gymnasium and social gatherings. As this is the first building which the association has ever been able to call its own there is rejoicing among the older members who have worked, prayed and waited for many years to see it, and among the younger ones who realize more fully than ever before that the association is one of the permanent and prominent organizations for the good of this great city and the salvation of its young men. No convention has been held during the two years.

CHARLES H. SHUTE, Cor. Mem.

MAINE.

The year just closed has been marked by progress of a permanent character at several points. At Portland work has been begun on a new building and a department for railroad men has been partially organized with a pledged membership of two hundred, through aid rendered by H. O. Williams, of the international force. The Lewiston association has moved into quarters fitted up for it in a new building on one of the principal business streets. The permanent endowment fund of the Bangor association has increased from \$4,200 to \$11,150. C. M. Bursley, formerly acting general secretary at Auburn, is now physical director at Bangor, the vacancy in Auburn having been filled by H. C. Wilson, of Saginaw, Mich. J. C. Corson, general secretary at Augusta, has resigned; his successor has not yet been secured. The state convention held at Waterville, October 16-18, was one of the best in years and showed the local and college work throughout the state to be in a healthy condition. The success of the convention and the good standing of the local and college associations is due in no small degree to the labors of Field Secretary W. B. Millar, of the international force, who was our acting state secretary for three months during the year. The state committee reports all bills paid to date.

GEORGE H. HOPKINS, Cor. Mem.

MARYLAND GROUP.

(Maryland, West Virginia, Delaware & District of Columbia.)

The two years since the last report from our group organization have been years of decided progress. The number of associations has not increased, but the quality of work has been much improved. The associations at Cumberland, Hagerstown, Frederick, Wheeling and Baltimore have shown marked advances. The association building at Washington, D. C., was destroyed by fire during the summer of 1895, and this calamity was followed in the early autumn by the death of the general secretary, James E. Pugh. These losses coming so closely together proved a serious blow. The International Committee gave timely help and counsel, and the association, even in its temporary quarters and under new leadership, is now doing excellent work. The canvass for a new building, to be erected upon a scale suitable to the requirements of the work and in keeping with the dignity of the capital of the nation, is now in progress.

In the summer of 1895 Secretary F. W. Lang resigned, since which time we have been without the services of a regular traveling agent. We have been favored, however, with the special help of W. B. Millar, one of the field secretaries of the International Committee. The decided impetus given to the work at Hagerstown, Frederick and Cumberland was largely due to his efficient efforts.

College deputation work has been carried on with the assistance of students from Johns Hopkins University, and the work in our colleges is encouraging. The convention at Hagerstown, Md., in January, 1896, proved one of the best ever held in this jurisdiction. The religious work in all the associations has been well maintained, and many conversions have been reported. Our associations now number thirty-five—city and town, twenty; college, thirteen; railroad, two. There are twenty-seven employed officers.

We are indebted to the International Committee, not only for the efficient work of Mr. Millar, but for frequent visits from other members of the international force.

JOHN H. ADAMS, JR., Cor. Mem.

MASSACHUSETTS AND RHODE ISLAND.

For the past two years, both the state committee and the associations of Massachusetts and Rhode Island have aimed rather to strengthen than to multiply their organizations. During this time they have realized the following results :

The state committee took possession of its endowment building in

ASSOCIATION BUILDING, FITCHBURG, MASS. DEDICATED JANUARY I, 1895. feet. Cost, \$85,000. I

Population, 28,000.

Dimensions, 70 x 90 feet.

Boston in July, 1896. The property cost \$152,000. The current expenses of the state work last year were \$11,700. The year was closed without debt and with a balance of \$150 in the treasury. Each month the bills were met promptly. During the past ten years the state committee has borrowed no money for current expenses—this satisfactory record being made possible by the indefatigable efforts of State Secretary Armstrong.

Our chairman, O. H. Durrell, is carrying forward the well laid plans of former years as well as stamping the energy of his own personality upon the opportunities of the present.

New buildings have been finished and occupied at Fitchburg, Springfield, Melrose, and Amesbury. A building has been purchased by the North Adams association at a cost of \$16,000. A building has been erected and dedicated at Malden costing with land \$90,000, and one is in process of erection at Cambridge which will cost with land \$125,000. At Bristol, R. I., Salem, Hyde Park and Haverhill building movements are assuming definite shape, the three former associations having already purchased sites.

The disposition to organize new associations has been held in check, only two having been added to the list, Leominster and Athol, both of which employ general secretaries and have a fair equipment. There are now ninety-one associations with a total membership of 28,900 But one association has disbanded during the past seven years—a significant fact, showing both the need and value of supervisory work by the state committee. The Worcester association has paid a floating debt of \$12,000, and Attleboro has paid off its mortgage. There are now 216 corresponding members, many of whom are doing splendid work for the young men of their respective towns. Work for young men is carried on during the summer months in small towns by college students. Andover Theological Seminary sends out a young man each Sabbath to help in association work.

Educational work is receiving special attention at several points, and the Boston association employs an educational director. New buildings and new equipments afford valuable opportunities for this growing, practical and attractive feature of our work, and great improvement has been made.

The association athletic departments have as a rule become identified with the Athletic League of North America. Indoor meets have been held in many localities.

District work has received considerable attention and the associations in the various districts have been stimulated to better work through conferences and committee intervisitation. Deputation days have been held in small towns. Successful district conferences of the women's auxiliaries have been held under the direction of the auxiliary state executive committee. The all-day meeting of the state committee and salaried officers of the association, held in December each year, is an occasion of much social enjoyment and spiritual benefit. The annual banquet of the state committee and business men from all parts of the two states is held usually in March, and affords a rare opportunity to enlighten and interest men of wealth in all the branches of international, state and local work. The official publication, *The Two States*, enables the committee to exert a helpful and stimulating influence upon both officers and members of the associations in all portions of the field. Interest is increasing in Bible classes and mass meetings for men. Gratifying results are noted in the majority of our associations, and through the various forms of district work at least two hundred young men have commenced a life of faith in and service for our Lord Jesus Christ.

Notwithstanding the financial disturbances of the past two years and their retarding influence upon all branches of Christian activity, the outlook is still hopeful.

With gratitude we report the past, but more than ever do we feel that "Except the Lord build the house, they labor in vain that build it."

JAMES A. HALE, Cor. Mem.

MICHIGAN.

Two years of unparalleled struggle for proper maintenance of the conditions of association work in the state have just passed. The financial burden has been heavy upon many associations. In spite of this better educational work has been done, excellent gymnastic exhibitions have been given, and the attractiveness of all association features has been maintained.

The convention held in Owosso has been characterized as one of the most helpful spiritually of any ever held in the state. The associations in Michigan are certainly popular centres for young men.

H. M. Clarke, who by his faithful and able work as state secretary had largely built up the associations in the state, left November 1, 1896. His successor has not yet been definitely named. The state committee has been greatly benefited by the excellent services of their beloved chairman, H. G. Van Tuyl, of Detroit, during this interval. The important features in this state are a growth in membership of 594; large increase in corresponding members, and the establishment of an association at the University of Michigan by very strong, earnest men. The state committee is fully in sympathy with all progressive efforts to maintain and increase the association army, and yet is endeavoring to be most careful in establishing work so that it may be permanent.

CLAY H. HOLLISTER, Cor. Mem.

MINNESOTA.

The work of the state committee has been carried on since our last report with an encouraging degree of success. A second assistant in the person of F. M. Hill has been added to the executive force during the year, but the demands of the work are so pressing that we are unable even with this increase to do all that should be done for the young men of the state, and are compelled to defer for the present many plans for extension. The committee has been well supported financially, and the close of the year finds it practically free from debt. At our convention held at Rochester, in 1896, over three hundred young men were present, and we hope for a larger attendance upon the convention to be held at Red Wing in February, 1897.

We now have eighteen city, college and railway associations, at eight of which secretaries are employed. At six of these points educational work is carried on, six support physical work, and twenty-five Bible classes are conducted.

Four counties are organized—three of them in charge of secretaries in which work is carried on at thirty points. Corresponding members to the number of 150 give efficient aid in personal and financial work.

Other special lines of effort are: (1) Work among woodsmen in the lumber camps during the winter, employing the services of two men who go from camp to camp holding meetings and distributing good literature. Owing to the mildness of the past winter and the small cut of lumber this work was not taken up, but in former seasons excellent results have been obtained. (2) Student vacation work, carried on during the Christmas vacation of 1896 by eighty-five students from different colleges of the state, who visited seventeen towns in bands of five each, holding frequent meetings and doing personal work in the intervals between them. Many conversions result directly from such efforts, and foundations are laid for permanent association work. (3) Young Men's Sundays, which are held at points outside the radius of direct association influence, and at which bands of young men are gathered for prayer and conference.

The state committee gratefully acknowledges aid from the International Committee through visits by Messrs. Copeland, Ober, Michener, Ward and Weidensall.

DWIGHT C. WOLCOTT, Cor. Mem.

MISSISSIPPI.

The work for young men in Mississippi has been as satisfactory as its friends could have hoped. The college work has been especially prosperous. There is a flourishing association in every good college in the state. Several of our smaller schools and academies have organizations that are doing well and training men in spiritual work. The conferences at Knoxville, Tenn., have been a great stimulus to the work among our students and their importance is recognized more and more every year.

Our city and town associations, with the exception of Natchez, are not reporting much work.

We are greatly indebted to the International Committee for the valuable services rendered by Messrs. Andersen and Brockman.

The state feels that it has suffered a great loss in the resignation of Secretary F. L. Willis, whose splendid qualifications have been demanded by another field. His successor, L. E. Buell, has entered upon his work with good promise of success.

J. R. DOBYNS, Cor. Mem.

MISSOURI.

There are in the state to-day eighteen town and railroad associations, expending last year for current work \$42,844, of which amount \$16,504 is the result of membership dues. Active college associations are at work in each of the principal colleges of the state and in the State University and Normal School. S. D. Gordon has been state secretary for eight months of the past year, and we have had from time to time the efficient services and invaluable counsel of Cecil L. Gates, resident field secretary of your committee. The reports handed in at our state convention just held show, without exception, encouraging statistics from each of the smaller cities and towns of the state where associations exist.

In St. Louis the cyclone early last summer damaged the central building slightly, the South Side building very seriously, and completely demolished the East Side building. The work upon the new central building has gone forward under difficulties. Business depression and cyclone losses have prevented its completion. The directors have consistently pursued the policy of pushing the work only so fast as the funds were in hand. The total cost of this building, exclusive of ground, is estimated at \$200,000 ; the sum of \$75,000 is yet needed to complete and equip it. The agreement providing for the erection of a building for the railway men at the Union Station and the maintenance of its work for fifty years has received the signatures of seventy per cent of the railroad corporation interests involved. Secretary C. J. Hicks has rendered invaluable assistance in this connection. The other branches in St. Louis show earnest work and gratifying results.

At St. Joseph early last year R. D. Duncan, for a long time a member of the board of directors at that place and of our state executive committee, laid aside his other business affairs and gave his time to association work, accepting the vacant secretaryship. An active campaign for members resulted in a net gain of over four hundred. The association's rooms have been put in first-rate condition, and the work is active in all its branches.

Springfield has largely increased its work and has enrolled in its weekly Bible classes fifty-five men, the largest number of any association in the state.

Kansas City having lost its building through foreclosure of the mortgage upon it, has formed a new corporation and started afresh in a leased building. This is centrally located and is being rapidly equipped for the work, which is growing in all its departments. Dr. F. L. Riley, who has been for a number of years the physical director, has been made secretary. The association's future looks brighter than at any time for many years.

During 1896 a professional students' conference, the second of its sort, for the training of Christian students in medical and dental schools for intelligent association leadership, was held in St. Louis, and attended by men from four institutions. The Lake Geneva conference was attended by ten men, representing five institutions of the state.

A district conference was held during the past year at Neosho, representing the southwestern district of the state. A tent was furnished during the state military encampment this year, and placed in charge of representatives of our state committee.

The state convention for 1896 was held at Fayette, the location of Central College, February 6-9. The total number of delegates was 162.

H. M. BEARDSLEY, Cor. Mem.

NEBRASKA.

The state work of Nebraska has been largely held together through the efforts of the secretaries of the International Committee; Mr. Copeland has given part of his time as acting state secretary, the railroad work on

ASSOCIATION BUILDING, KEENE, N. H. DEDICATED SEPTEMBER 28, 1894. Dimensions, 60x 101 feet. Cost, \$38,500.

Population, 7.500.

the Union Pacific has been carefully looked after by Mr. Gates, and other help has been rendered by Messrs. Ober and Michener.

Successful work has been accomplished at Lincoln, Grand Island, Fremont, Chadron, Hastings and Norfolk, and by the college organizations in the State University, Wesleyan, Bellevue, Doane and Hastings. Considerable interest was awakened by the labors of C. V. Vickery, of Wesleyan University, who gave much time to the college work during the year. The college associations were well represented at the Lake Geneva student conference.

The strongest work is being done at Omaha, where there is a membership of over eleven hundred. Frank W. Ober, who resigned to take charge of *Men*, was succeeded in the general secretaryship by F. L. Willis, formerly state secretary of Alabama. A branch organized at South Omaha is doing excellent work among the employees of the packing houses and stock yards.

The convention at Lincoln was one of the most spiritual in the history of the state. Messrs. Copeland, Gates and Michener represented the International Committee. Charles T. Studd, of England, Chancellor McLean, of the State University, and Gov. Silas A. Holcomb were among the speakers. C. F. HARRISON, Cor. Mem.

NEW HAMPSHIRE.

The past two years has been a period of great prosperity for young men's work in New Hampshire. Associations have been organized at Franklin Falls and Rochester; also in Phillips Exeter Academy. Portsmouth has been rejuvenated and has just entered new quarters. Three district conventions have been held.

Claus Olandt, Jr., has been our state secretary. There have been many secretarial changes, only three who were employed two years ago remaining. At present there are nine general secretaries and five physical directors. Also Dartmouth College association has lately secured a general secretary in the person of H. O. Aiken. The Vermont-New Hampshire convention held at Manchester, September, 1896, proved to be the best ever held in this territory. The International Committee has been represented at both our state conventions. The associations have prospered spiritually as well as materially, and we have a bright outlook before us. H. E. FAY, Cor. Mem.

NEW JERSEY.

The past two years have not witnessed any increase in the number of associations in this state. Several have ceased to exist—with one exception, in rural districts. The exception is Bridgeton, the oldest organization in the state. A healthful tone and a spirit of progress pervades the associations in general and in some directions positive advances have been made. A gain in membership is noted.

Salem has occupied its new building. Millville has secured possession of its property and made extensive improvements. At Long Branch, Montclair and Passaic, new buildings will be erected during the year.

New Jersey enjoys the distinction of being the only state employing a

state secretary for the educational department. Under the direction of A. B. Clemens, the results in this department have practically doubled, in men enrolled, in equipment, annual expenditure and efficiency.

Boys' work is widely prosecuted with good spiritual results. A new railroad department has been organized at Camden, while preliminary work has been done at other points. The number of college associations is unchanged, but a decreased membership is noted, the number of enrolled students being materially less in all our colleges and schools.

The district work is well organized. Conferences were held with good attendance in each district. Many new corresponding members have been secured. Eighty are now enrolled. A conference of corresponding members was a feature of the last convention.

The spiritual work of the associations is showing good results especially along the line of gospel meetings. The number of Bible classes is practically unchanged.

The state work is well organized under State Secretary Arthur Lucas. The International Committee has aided particularly in the railroad and educational departments, and has been ably represented at the state conventions. EDWARD P. HOLDEN, Cor. Mem.

NEW YORK.

In New York we have undertaken the experiment of holding biennial state conventions. The last annual state convention was held at Newburg in February, 1896.

This year the nine districts of the state were grouped into three division conventions, that for the western division being held at Geneva; for the central at Cortland, and for the eastern at Poughkeepsie, all of them occurring during February. The result has been gratifying as compared with single state conventions; the aggregate attendance was 823, an increase of over 300; the amount of money raised \$10,800, an increase of \$2,000; while the aggregate attendance at the Sunday afternoon men's meeting for the three division conventions was over 2,000, or more than twice that for similar meetings at annual state conventions.

The reports as presented to these three gatherings show that while the work here as elsewhere has had to meet the depressing business stagnation of the past two years, it has been stemming the tide and moving steadily forward.

There are at present in the state 147 associations and nineteen sections, divided as follows: For students, twenty-eight; railroad men, thirty-one; French and German young men, three; clerks and mechanics and the great body of young men generally, eighty-five, while there are also fortynine boys' branches. The total membership is 40,577.

In addition to all this, an annual work is carried on among the 6,000 national guardsmen at the state camp at Peekskill, while in the unorganized towns of the state we are represented by 281 corresponding members.

These associations own fifty-eight buildings valued at \$4,088,750, ranging from \$2,400 to \$850,000 and including the splendid building of the West Side branch, New York City, valued at \$540,000, which was dedicated in November, 1896, and is one of the largest and best equipped buildings yet erected anywhere for the work.

These associations employ 228 secretaries and assistants for the systematic prosecution of the work, and provide 338 educational classes and seventy gymnasiums for the careful, thoughtful training of the minds and bodies of the members for the battle of life.

Associations to the number of 99 report Bible and training classes, and 138 hold young men's meetings for their spiritual training and report an average weekly attendance of 7,146, while the throng that presses in and out through the doors of these associations averages nearly seventeen thousand a day. The cost of the work in 1896 was \$450,797, provided by the members and their appreciative friends.

The work among railroad men is vigorously prosecuted as it necessarily must be; for of 123 railroad associations and departments in the United States and Canada, thirty-one, with forty-nine secretaries and 9,448 members, are a part of the New York state association. Six own buildings and the Albany railroad association has just secured funds to erect a building to cost \$26,000.

The school and college work has twenty-eight associations with 2,025 members. The boys' department, than which none is more successful or promising, with its 3,541 members is doing effective service in training the future men of the association. The splendid condition of this work is largely due to the self-sacrificing and gratuitous service of our assistant secretary, Sumner F. Dudley, whose love and devotion to this cause for many years has in return made him beloved and respected by the associations throughout the country and whose serious illness at this time commends him to the sympathy and earnest prayers of his friends everywhere.

The work in all its departments has received the unceasing watchcare of the state committee and State Secretaries Goodman and Hall and their assistants in constant visitation and correspondence with the various associations, aided by the advice and counsel of the International Committee.

Especial effort is now directed to the great field of labor in the unorganized towns and villages of the state. Of these 130 have been visited during the past year with excellent results, which it is hoped will constantly increase.

W. H. MICHALES, Cor. Mem.

NORTH CAROLINA.

The lessened pecuniary support accorded to the state work the last two years has precluded any important extension. Two secretarial points have been temporarily abandoned, but the others have all been greatly strengthened and show an advance. All our associations have materially reduced the indebtedness carried forward from the disastrous year of 1893. The smaller associations have also been invigorated. Thus the work on the whole has not gone backward but forward.

The college work shows a decided improvement in vigor and in spiritual tone. There has been no general revival in the town and city associations but a steady growth in religious life and interest. At Trinity College and some other educational points there have been marked awakenings, and it is believed that the religious life in our colleges is advancing in efficiency. Greater interest is also felt in the student missionary movement and in college and other conferences and in Bible study. The financial difficulties of the past two years have taught self-reliance and have developed a spirit of self-sacrifice in Christian work.

Mr. Andersen, of the international force, has greatly aided our state work, and, together with Mr. Brockman, has attended our state conventions.

GEORGE B. HANNA, Cor. Mem.

NORTH DAKOTA.

In spite of discouraging circumstances our state has made some advance in an increased interest if not in the number of associations. Work at the two secretarial points, Fargo and Grand Forks, has been steadily advancing. The association at Devil's Lake is also in a prosperous condition. The associations in the State University at Grand Forks and in the Agricultural College and Fargo College at Fargo are doing good work and report several recent conversions. There are also two Indian associations on the Fort Totten reservation.

Young Men's Sundays have been held in several places with good results. Our state convention was held amid blizzards and railroad blockades and consequently with small attendance, but the spirit of the gathering was excellent. L. W. Messer of Chicago and C. S. Ward of Minneapolis were present and their addresses and suggestions were very helpful. We have no traveling agent, but the state work is under the care of Secretaries Van Vranken of Grand Forks and Day of Fargo. Some help has also come from the International Committee, and the outlook for the coming year is promising.

T. CARTER GRIFFITH, Cor. Mem.

OHIO.

Despite numerous changes in our secretarial force, Ohio has had a year of most gratifying advance. We have twenty-nine city, six railroad and thirty-one college associations, a total of sixty-six. These have a membership of 18.000, and have been conducted at a total cost of \$140.000.

We may well call 1896 our year of greatest permanent growth. Building movements have progressed rapidly, and at the end of the year we find this gratifying result: Hiram College with a \$25,000 building in progress; Adelbert College with \$15,000 in hand and \$5,000 in pledges; Ohio State University with \$9,000 pledged; Springfield with a start of \$10,000; Newark with \$20,000; Mansfield with \$30,000; Lorain with \$9,000; and Toledo, just beginning its canvass, with \$10,000. Ohio now has association property valued at \$1,150,000.

The college work was never so efficient as now. More members are enrolled, more money pledged and greater actual results reported than any previous year. This is particularly true of the professional schools at Cincinnati, Cleveland and Columbus, under the supervision of Secretary Beaver, of the International Committee, and College Secretary Wilbur, of the state force.

ASSOCIATION BUILDING, MAUCH CHUNK, PA. DEDICATED JUNE 28, 1894. 4 feet. Cost, \$62,000.

Population, 7,000.

Dimensions, 58 x 74 feet.

Four district conferences have been held and are declared by common voice to have been the strongest gatherings of this nature ever conducted in Ohio. Every secretary but two was present, and but one association was unrepresented.

In response to the request of the state committee, valued service was rendered at the state convention of 1895 by Messrs. Hicks and Hodge, and at the convention of 1896 by Messrs. Cephas Brainerd, Morse and Beaver, as representatives of the International Committee.

The railroad work has had special attention, and steps have been taken which will mean great things for the future history of this department in the state. An organization will be formed at Corning upon the erection of its \$4,500 building, already provided for, with the co-operation of the railroad secretaries of the International Committee.

The year, on the whole, has been marked by the careful removal of dead wood, and the development of permanence and stability in what was allowed to remain.

S. P. FENN, Cor. Mem.

PACIFIC NORTHWEST.

(Oregon, Washington, Idaho and British Columbia.)

Notwithstanding the serious business depression in our section of the association field the work has been maintained and some advancement made. Several city associations have received valuable training along financial lines, and when times do brighten the directors will see that money is provided at the beginning of the year and that debts are avoided.

Since our last report we have lost no city associations and have added to the list three college organizations, giving us one railroad, twenty college and eleven city associations.

Several points are seeking an organization, but the executive committee moves very slowly in any attempts at new work but rather gives time and effort to strengthen and upbuild places already organized.

We hope in the near future to report some interesting developments. James A. Dummett, our efficient traveling secretary, has entered upon his seventh year with the committee, and with his strong hold upon the business men in this field and his knowledge of the different situations, we believe that as business revives there will come a marked growth along all lines of association effort.

The International Committee through one of its members, Mr. Frederic B. Pratt, and its secretaries, Messrs. Ober and Michener, has materially furthered the work of the executive committee.

GEORGE F. ORCHARD, Cor. Mem.

PENNSYLVANIA.

There are at the present time 151 associations in Pennsylvania—eightyone in towns and cities, forty-nine in colleges and other educational institutions, and twenty-one among railroad men—a total gain of four since my last report. These figures, however, do not include the organizations in small towns, known as "district sections," of which there are some twenty or more. Men to the number of 157 are employed, including state secretaries, general secretaries, assistants and physical directors, an increase of nineteen during the two years.

Last June the state committee arranged for a ten-days Bible conference, designed to do for the members of our city and railroad associations what the Northfield conference does for the members of our college associations. It was attended by 336 delegates and was a marked success in every particular. The state convention has instructed the committee to arrange for such a conference annually.

Thirty-four of our associations now own buildings valued at more than \$2,000,000, and other associations are in the midst of building canvasses.

International Secretaries Hicks, Williams, Hodge and Beaver have each spent a few days in the state, attending conventions and otherwise rendering valuable aid to the work. C. H. ZEHNDER, Cor. Mem.

SOUTH CAROLINA.

Association work in South Carolina is on a more solid foundation than formerly, and despite some conditions that have always made this a trying field there is an encouraging outlook. Two associations maintain secretaries, Charleston and Columbia. Edgefield County employs a secretary and much good work has been done there. We still co-operate with the state committee of Georgia in supporting a joint state secretary.

The Charleston association has been conducted on broad lines and is on a sound financial basis. The headquarters of the state committee have been transferred from Columbia to Charleston. The college work has prospered. A well-organized work is now conducted in each of the three state institutions as well as in most of the denominational colleges.

We acknowledge timely visits from Secretaries H. O. Williams and F. S. Brockman of the International Committee.

ATHA T. JAMISON, Cor. Mem.

TENNESSEE.

During the past two years Tennessee has been much of the time with out a traveling agent, and largely dependent upon the International Committee for its supervisory work. Fortunately, however, H. P. Andersen, your committee's field secretary for the south, has been able to devote one-fourth of his time to this state as our acting state secretary.

Special efforts were made to secure the full services of a traveling secretary, and F. B. Smith accepted the call of the committee, beginning work May 1, 1896. He rendered excellent service during the summer, but the extraordinary financial stringency made it necessary for him to resign. This made the state committee again dependent for its visitations upon Mr. Andersen, the International Committee willingly granting the time.

The work of the city and town associations, while showing no marked advance, has been kept up to the standard of previous years. The Nashville association again occupies its building, which was rebuilt after the fire, and is doing well. The Knoxville association has secured a valuable building lot and hopes to build as soon as times are more favorable.

State conventions have been held in Sweetwater and Murfreesboro,

both well attended and resulting in the strengthening of the work throughout the state. A district convention was held at Rogersville.

There are now twenty-one college associations in the state, all of which are doing excellent work and show marked increase, particularly in Bible study and thorough organization.

The annual student summer school at Knoxville has proven of much benefit in the thorough training given there to the leaders.

The association at Maryville College is erecting a building, the students assisting by their own labor in its construction. The colleges have received frequent and exceedingly helpful visits from the college secretaries of the International Committee, Messrs. Brockman and Matthews.

JAMES H. COWAN, Cor. Mem.

TEXAS.

There are nineteen town and twelve college organizations in the state with a membership of 7,300 against 5,300 two years ago.

There are fifteen general secretaries, eleven assistants, and eight physical directors employed, besides the state force. Houston and San Antonio have both shown remarkable development of their educational work. The Denison association has shown wonderful strength in strictly spiritual work.

The state convention held in Austin April, 1895, was the largest ever gathered, and the one in Palestine a year later was a success. At both conventions there were conferences of college presidents which proved of great value to the college work. Athletic contests were held during each convention, the Dallas team winning both times. At the close of each convention a general secretaries' conference was held.

Messrs. Marshall and Luce have rendered us assistance in the student volunteer work, I. E. Brown in the state work and Dr. Eastman and C. L. Gates, of the International Committee, in the state convention and conferences. JUDSON B. PALMER, Cor. Mem.

VERMONT.

The outlook for association work was never better than at the present time. Seven of the eight city and town organizations employ general secretaries. Burlington, Rutland and St. Johnsbury also employ physical directors. Montpelier and Rutland have secured fine and commodious quarters since our last report. There are college and academic associations in connection with Middlebury College, University of Vermont, Montpelier Seminary and St. Johnsbury, Vermont and Troy Conference academies.

The state was divided into districts early in 1895 and committees appointed in each for the purpose of instituting deputation work, which has been carried on during two years with excellent results.

Much credit is due to our indefatigable state secretary, Claus Olandt, Jr., for the efficient work done for the associations and for the spiritual welfare of young men. Vermont and New Hampshire, through the co-operation of the International Committee, were united in a single jurisdiction for state work some three years since, and a profitable convention has been held each year.

G. F. NORTH, Cor. Mem.

VIRGINIA.

Virginia has forty-six associations—seventeen city and town, eighteen college, ten railroad, one army. Thirteen associations own buildings and lots valued at \$237,550. A new building has been opened at Petersburg. Extensive improvements have been made in the equipments of the Norfolk, Richmond and Roanoke (railroad) associations. Portsmouth has a building fund pledged of \$15,000, and the Virginia Polytechnic Institute one of \$4,700. Three railroad associations have small building funds paid in—Bluefield, \$600; Radford, \$670; Newport News, \$350. There is a total membership of 6,053. Twenty-eight reading rooms and nine gymnasiums are open daily. One secretarial point has been lost, Pulaski.

The nineteenth annual convention met in Staunton, February 6-10, 1895, with 290 delegates. Messrs. H. Thane Miller and E. L. Hamilton represented the International Committee. The twentieth convention met in Portsmouth, February 12-16, 1896, with 286 delegates. The international representatives were H. O. Williams, W. E. Lougee and F. S. Brockman. L. A. Coulter, late of North Carolina, succeeded H. O. Williams as state secretary.

Valuable service has been rendered by Secretaries Brockman, Hodge, Hamilton, Andersen, Williams and Hunton, of the international force. S. M. Sayford, the college evangelist, visited several of the colleges in the state during 1896, and many students were helped spiritually.

During the past year 145 religious meetings were held each week, and a total of 584 professions of faith were reported. The work throughout the state is healthful and vigorous.

CHARLES R. TOWSON, Cor. Mem.

WISCONSIN.

Wisconsin has eighteen town, nine college and two railroad associations, alive and employing thirty persons, including two state secretaries. Some changes have taken place during the two years but most of the associations have maintained a safe degree of growth. Oshkosh, which was closed for three years, has recently opened up in its own building and the future looks hopeful. The Madison work has been feeble for several years, but since the summer of 1896 has taken a long step forward. Baraboo also was never more promising, while in Waukesha a new building with a net value of at least \$10,000 will be occupied before April first.

The college work has been perhaps more encouraging than any other department and has received untold good through the student conference at Lake Geneva. The railroad department in Milwaukee, which nearly three years ago opened a lunch counter, found itself obliged to move into larger quarters, and in January, 1896, occupied what had formerly been a hotel with lunch counter, large dining room and fifty-five bedrooms besides working rooms for the association. The move proved to be a wise one and the entire building is in constant use. The Milwaukee central building was burned in March, 1895, but was fully insured and was re-occupied with many improvements the next October. Since that time the membership has reached a higher number than ever before. County work has been fairly started and one county secretary is now at work. The "group" system in smaller towns and the corresponding member in every town is our objective point outside the larger places. Wisconsin is weak in Bible classes and in junior work. In the last state convention both these were strongly emphasized. A boys' camp was held in July, 1896, with representatives from three associations. It is hoped to make this an annual feature. The two state conventions have been specially strong, and not a little because of the exceedingly helpful work of the secretaries of the International Committee who were with us. The Kenosha convention was one of the most spiritual in character ever held in the state.

The amount of property, net value, is about the same as two years ago, \$225,000. A few of the buildings are mortgaged but not enough to jeopardize the interests of the work. Nevertheless, it is the object of the directors of the state association to prevent, if possible, any association from opening a new building until every dollar is provided for. The state work has been well guided by our two secretaries and we believe that the future has better things in store for us.

C. B. WILLIS, Cor. Mem.

TABLE III.-CITY AND TOWN ASSOCIATIONS.

Summary of Table III.

725 a	ssociation	s and b	ranches exist.
707	6.6	report	officers or statistics.
676	66	6.6	a total membership of 189,543.
637	5.6	6.6	an active membership of 88,876.
580	+ 6	6.6	working committees with a membership of 24,480.
614	4.6	66	\$2,097 636 paid out last year for current expenses.
509	6.6	6.6	libraries containing 426.233 volumes.
564	6.6	66	a total average daily attendance at rooms of 74,217.
619	86	6.6	reading rooms.
513	**	**	attention to physical training; 480 of these through gymnasiums, and 314 through athletic games and sports.
345	6.6	6.6	52,672 different men using physical means.
159	6.6	6.6	literary societies, with a total average attendance of 3,990.
341	6.6	6.6	2,306 educational classes, attended by 24,138 different students.
469	65	. 44	3,736 lectures, entertainments, etc.
528	44 _	6.6	3,363 sociables.
316	64	6.6	10,5r6 situations secured.
464	44.7	6.6	women's auxiliaries and committees.
428	46	66	the November week of prayer observed.
592	**	**	38,549 young men's religious meetings, 37,632 of which had a total attendance of 2,070,978.
317	6.6	66	10,208 Bible class sessions, 10,144 of which had a total attendance of 142,405.
222	6.6	66	6,364 training class sessions, 6,357 of which had a total attendance of 60 314.

[Combining the above two, 415 associations report 16,572 Bible and training class sessions, 16,501 of which had a total attendance of 202,719.] 334 associations report work for boys.

334	4.6	6.6	a membership in the boys' department of 21,021.
184	65	65	316 rooms for boys.
247	6.6	6.6	7,970 religious meetings for boys, 7,784 with a total attendance of 220,921.
192	44	6.6	2,910 secular meetings for boys.

THE MOST POPULAR OF GAME BOARDS.

xiv

Nothing like it ever yet produced, although it is a combination of four popular games, making it a parlor game that is without equal.

EVERYBODY PLAYS

The great combination game that leads them all.

CASTILE, NEW YORK.

DELIGHTS THE BOYS. INTERESTS THE GIRLS. AMUSES THE OLD FOLKS.

The game board is finely finished and has metal corners and arches nickel-plated. With it is furnished four game pieces of different colors and four cues with leather tips. Q.-K, is the ideal home game, and will furnish entertainment for the entire family. Q.-K, should be found in every Y. M. C. A. and other society rooms. CUE-QUET -(Q.-K.)—is played on a board 25 x 42 inches, with raised sides, and can be placed on any table. The feature of the game is the rubber cushion around it, so that a carom can be made equal to a rubber ball. WRITE FOR SPECIAL PRICE TO Y. M. C. A's.

and you will be more than pleased.

PATENT APPLIED FOR. READ WHAT GENERAL SECRETARIES SAY OF IT.

I want to add my testimony to the real value of the game. Nothing we have ever had before will compare with it. Old and young alike praise it. It has caused a perceptible increase in the attendance at our rooms. S. W. MOORE, Gen'l Sec'y. S. W. MOORE, Wis,

Milmaukee. Wis

DEAR SIRS-We have six games of Carroms in our building and some times all of them are in use at once. We regard it as one of the best games we ever introduced and its pop-nlarity grows. C. B. WILLIS, Gen'l Sec'y Y. M. C. A. Elkhart, Ind.

GENTLEMEN-I can heartily recommend your game Carroms. We had only one in our Association, and when the Board of Directors saw how it was used they ordered that others be purchased immediately. We have had them about two months, and the only time the boards get cold is when the building is closed. Yours very truly, E. A. KNAPP, Gen'l Sec'y. The above are but samples, lack of space forbids their multiplication. Now as to terms. We will send a sample game to any Y. M. C. A on thirty days' trial; if not satisfactory, same can be returned.

We make the following prices to Associations per single game. Special prices for onehalf dozen lots.

Birch, at \$2.50 f. o. b. Ludington. Birdseye Maple, \$3.00 f. o. b. Ludington. Onr '97 model is a great improvement over '96.

ARCHARENA COMBINATION BOARD.

Size of the Board is 24 inches square. Patented June, 1893, and 1897, with Carrom combined.

The two cuts show the two sides of one board. The newest and greatest Combination game board with Four Games, On one side two games, Carroms and Checkers, on the other, Archarena and Ditch Carrom.

Chicago, Hyde Park, Y. M. C. A., writes: "IT IS ALL THE RAGE."

"Straws show which way the wind blows."

ARCHARENA Co.:

CAN I HAVE TWO MORE OF THOSE ARCHARENA (Combined) AT SAME PRICE? D. J. McNichol, Chair Boys' Work Com. Y. M. C. A., Newton, Mass. Feb. 23, 1897.

Gentlemen: The Archarena Combination Board you sent me is the best game I ever had, and the price is very low. It is really a work of art, and you may send A. MEYER, President Y. M. C. A, Newburg, N. Y. two more of the same kind at the same terms. March 5, 1897.

MT. PLEASANT, Ia., Feb. 2, 1897.

Dear Sirs: The Combination Board came some time since IT IS ALL RIGHT. The only fault, which is a great point in its favor, is that it monopolizes the games, and the boys "scrap" because more cannot play. IRA LUTE, President, Y. M. C. A. Very respectfully,

410 GAMES IN Y. M. C. A. CONTESTS AT ROCHESTER, N. Y., FEB. 9, 1897. THE ARCHARENA CO., Peoria III.: Gentlemen.: Our Archarena Contest closed last Wednesday afternoon, and was a great success I can assure you. In all there have been played, during the fourteen contests, 410 games by thirty-three different players. Our closing contest brought us to the climax in real earnest. Two boys had won five buttons each, and the enthusiasm was intense, some fifty boys being present to watch the fun. Thus you will see that our contest was indeed a great success and we are very much indebted to you for your courtesy in presenting us with the buttons and the board. Very truly yours, Apprint N. COTTON.

ARTHUR N. COTTON, Asst. Sec'y, Y. M. C. A.

CARROM ARCHARENA BOARD FREE. OUR CREAT OFFER TO ASSOCIATIONS.

Up to June 10th, any Y. M. C. A. that orders two of the \$2 plain Birch Boards without carroms, and these are best for Archarena contests), will receive an Arch-arena Combination Carrom Board FREE, provided they work a four weeks' contest one afternoon or evening each week, and give the Combination Board as a prize. We furnish simple rules for contests.

You receive the three boards packed in case, shipped at once by freight, and pay your own freight charges. That is, you get \$6.50 worth for remitting \$4. Now is the time to prepare a Summer contest.

Combination Board, retail price, \$2.50 for four games. Express prepaid east of Omaha. Special price to Associations, \$2.00.

ARCHARENA CO., Manufacturers, PEORIA, ILL.

Che Official Association Badge

Adopted by the International Committee in accordance with a resolution of the International Convention held in Springfield, Mass., in 1895.

The features of the badge are the external circle symbolizing the fact that the associations form one bodge are the external circle symbolizing the fact that the associations form one body; the center, consisting of a Bible open at the Gospel of John XVII : 21 ("That they all may be one"), resting on the familiar monogram of the name Christ, and the triangle with words on the three sides, Spirit, Mind, Body. This symbolizes the unity of man, whom the association aims to develop symmetrically, each part with reference to the whole. Issued in the form of a clasp pin, scarf pin, or button.

PRICES IN EITHER FORM.
